Acknowledgments

This is the fun part of doing a book, in which we thank those who made the work at Nabta and the book possible. Our largest, and perhaps most important debt is to the United States National Science Foundation, and the Director of its Anthropology Program, Dr. John Yellen, for nine research grants awarded to Wendorf in support of the research at Nabta between 1990 and 1999. We are enormously grateful to Dr. Yellen for his confidence in the merits of our work and the encouragement that he and the members of his review panels gave to all the members of the Combined Prehistoric Expedition. We also thank the State Committee for Scientific Research, Poland, for the constant financial support awarded to Schild. We hope this book and the data it presents amply reassure them that their confidence was not misplaced.

We also wish to acknowledge the support of our two institutions. Without their help, tolerance of our long absences in the field, and financial support the work at Nabta would not have been possible. In particular, we want to thank the late Dr. Kenneth Pye, who was President of Southern Methodist University when much of this research was done, Dr. Gerald Turner, now President of Southern Methodist University, and Professor Miroslaw Mossakowski, President of the Polish Academy of Sciences.

The Geological Survey of Egypt and the Egyptian Antiquities Organization have been important participants in our work in Egypt from the beginning, and particularly at Nabta. We want to thank our friends, the Geologists and Antiquities Inspectors, who joined us in the work at Nabta. We will always be in debt to them. Throughout our time at Nabta we had the good fortune of having Mr. Ali Assad Mazhar, then Director of the Geological Survey, as our surveyor and camp manager. Ali looked after us, kept us fed and out of trouble. We also want to give our special thanks to Mr. Ahmed A. Dardeeb, Mr. Gaber M. Nain, and Mr. Mohamed El Hinnawi, who were Chairmen of the Geological Survey of Egypt during the years we worked at Nabta, and Dr. Gaballa A. Gaballa, General Secretary of the Supreme Council of Antiquities, and their staffs, for their support throughout this project.

Several individuals and corporations have also provided financial support and we wish to acknowledge their generosity. Among the organizations are Atlantic Richfield Oil Company (ARCO), Crow Canyon Archaeological Research Center, and Shell Oil Company. Individual donors or their foundations include Mr. and Mrs. Clifford Alexander, Mr. and Mrs. Edward O. Boshell, Jr., Mr. Albert G. Boyce, Jr., Mrs. Sandra Duke Davis, Mr. Lee DeSanders, Dr. and Mrs. Marlan Downey, Dr. and Mrs. Edward Goodman, Mr. and Mrs. Albert Goldblatt, Ms. Midge Hill, the C. Paul Johnson Family Charitable Family Foundation, Mr. Jim Leake, Mr. and Mrs. Clifford Miercort, Mr. R. Lawrence Stevens, and Mr. Garry Weber. All of these benefactors received invitations to join us at our camp at Nabta, several accepted and worked along side us. One of them is an archaeologist and the author of several papers in this volume.

Our camp and research endeavors were also enriched by several volunteers who joined us for varying periods, often for a specific project. Among these are
Elijio Aragon, who came from New Mexico to operate a back-hoe that turned out to be beyond repair; Ms. Anna Christine Bednar, assisted in the excavation of several of the cattle burials; the late Dr. Jack Harlan, world renowned botanist, came to see where we found sorghum; Ms. Maria Gatto, ceramic specialist, came to help us unravel the ceramic sequence in the southern Western Desert of Egypt; Mr. Thomas M. Ryan, helped with the site survey; and Dr. Jon Young of Taos, New Mexico, helped us map and photograph the megalithic alignments. To each and everyone of these friends we offer our sincere thanks for their generous help.

Most of the superb line drawings in this book were done by Mr. Marek Puszkarski, of The Institute for Archaeology and Ethnology, Warsaw. Some of the artifact illustrations were drawn by Ms. Gail Wendorf, and a few others by E. Guminska. Credit for the artwork is given in the caption for each figure.

We also wish to express our gratitude to those who helped us put this book together. First, we want to acknowledge the assistance of Dr. Diane Holmes, who spent six very difficult months copy editing this volume. She brought to this chore a keen knowledge of North African prehistory, which together with her meticulous checking, rechecking and correcting the manuscript, the tables, and the illustrations, greatly improved the final product. She was ably assisted in this process by Dr. Amber Johnson, Research Associate in Anthropology. We also want to thank Mrs. Marylee Skwirz, who in addition to her regular duties as Wendorf’s secretary, managed to type, correct and prepare the 300+ tables in the volume. We owe special thanks to Ms. Sue Linder-Linsley, who prepared the camera-ready copy. Her careful checking also caught errors that had previously eluded us. Despite the best efforts of Dr. Holmes, Mrs. Skwirz and Ms. Linder-Linsley, the reader may find other errors, and for these we accept full responsibility.

To facilitate the preparation of the camera-ready copy, all of the text, the maps and line drawings, the photographs, and the tables were prepared in digital format. Five anthropology students at Southern Methodist University assisted in this effort. Three are graduate students, of whom two worked with us at Nabta and authored several chapters in this book. Mr. Alex Applegate assumed responsibility for the illustrations, many of which required minor corrections to fit our format, and Ms. Kit Nelson supervised the organization of the illustrations and assisted Wendorf with the statistics. The third graduate student, Mrs. Tara Bond-Freeman, and one of the undergraduates, Ms. Allison Mittler, assisted Applegate with scanning and correcting the illustrations. Finally, but not least, the other undergraduate, Ms. Laurie Taylor also assisted Dr. Holmes with the copy editing. We owe a great debt to all of these students. There was a lot to be done in the six month period when the book was assembled, and each felt considerable pressure to finish by the deadline. Nevertheless, they did their work carefully and with good humor. To everyone, thank you very much.

The research at Nabta was conducted by the Combined Prehistoric Expedition a cooperative effort sponsored by Southern Methodist University, the Institute of Archaeology and Ethnology at the Polish Academy of Sciences, and the Geological Survey of Egypt. The Expedition began in 1962 with the support of two key people: Dr. Rushdi Said, then Professor of Geology, University of Cairo and later Chairman of the Geological Survey of Egypt, and Dr. Bahay Issawi, at the beginning Rushdi’s graduate student at the University of Cairo who became our geologist and camp manager, and then, until recently, Vice Minister for Mining and Mineral Resources. To Rushdi we want to express our thanks for giving us such a good start. We also want to acknowledge our special debt to Bahay, because none of this would have been possible without his help through all these years.
