Computational Intelligence Methods for Bioinformatics and Biostatistics

14th International Meeting, CIBB 2017
Cagliari, Italy, September 7–9, 2017
Revised Selected Papers

Springer
Preface

The 14th annual edition of the International Meeting on Computational Intelligence methods for Bioinformatics and Biostatistics (CIBB 2017) built upon the tradition of the CIBB conference series and provided a multi-disciplinary forum open to researchers interested in the application of computational intelligence, in a broad sense, to open problems in bioinformatics, biostatistics, systems and synthetic biology, medical informatics, as well as computational approaches to life sciences in general.

In line with the spirit of CIBB, the 2017 meeting brought together researchers from different communities who address problems from different, but connected and often overlapping, perspectives. CIBB 2017 tackled the difficult task of bridging different backgrounds by providing an inclusive venue to discuss advances and future perspectives in different areas. It also fostered interaction between theory and practice, addressing both the theories underpinning the methodologies used to model and analyze biological systems, the practical applications of such theories, and the supporting technologies. Accordingly, participants at CIBB 2017 came from mathematical, computational, and medical backgrounds and institutions, both from academia and the private sector, offering collaboration opportunities and novel results in the areas of computational life sciences.

CIBB 2017 also offered a view on emerging and strongly developing trends and future opportunities at the edge of mathematics as well as computer and life sciences, such as synthetic biology, statistical investigation of genomic data, and applications to the understanding of complex diseases, such as cancer, and therapy opportunities. Along these lines, three keynote speakers, prominent scholars in their fields, presented the latest advances of their research within the context of their area of interest, and provided insights into open problems and future directions of general interest for the field. While papers in the main conference track addressed a rich set of open problems at the forefront of current research, the conference hosted three further special sessions on specific themes: synthesis of artificial cells by combining bio-interfaces engineering and systems biology modeling, modeling and simulation methods for systems biology and systems medicine, and molecular communication. Researchers from Europe, Asia, and America attended the conference.

CIBB 2017 was made possible by the efforts of the Organizing, Program, and Steering Committees and by the support of sponsors and participants. CIBB 2017 was held in Cagliari, Italy, during September 7–9, 2017. Overall, 44 contributions were submitted for consideration to CIBB 2017, amongst which 33 were invited for an oral presentation at the conference, after a first round of reviews (at this stage, each paper received an average of 3.25 reviews from the Program Committee and about 13 additional referees). Following the conference, selected papers were invited for further submission, after feedback and discussion from the conference. This volume collects the papers that were accepted after a further round of reviews (2.5 for each paper, on average).
From 2004 to 2007, CIBB had the format of a special session of larger conferences, namely, WIRN 2004 in Perugia, WILF 2005 in Crema, FLINS 2006 in Genoa, and WILF 2007 in Camogli. Given the great success of the special session at WILF 2007 that included 26 strongly rated papers, the Steering Committee decided to turn CIBB into an autonomous conference starting with the 2008 edition in Vietri. The following editions in Italian venues were held in Genoa (2009), Palermo (2010), and Gargnano (2011). Until 2012, CIBB meetings were held annually in Italy with an increasing number of participants. CIBB 2012 was the first edition organized outside Italy, in Houston, then in Nice, France (2013), Cambridge, UK (2014), Naples, Italy (2015), and Stirling, UK (2016).

A rigorous peer-review selection process is applied every time to ultimately select the papers included in the program of the conference, in the conference proceedings published in the LNBI-LNCS book series by Springer, and in some cases, selected papers were published in special issues of well-qualified international journals, such as *BMC Bioinformatics*.

December 2018

Organization

Program Committee

Antonino Abbruzzo University of Palermo, Italy
Marco Antoniotti University of Milano-Bicocca, Italy
Sansanee Auephanwiriyakul Chiang Mai University, Thailand
Massimo Bartoletti University of Cagliari, Italy
Gilles Bernot University of Nice Sophia Antipolis, France
Daniela Besozzi University of Milano-Bicocca, Italy
Andrea Bracciali University of Stirling, UK
Stefan Canzar Gene Center, LMU, Germany
Giulio Caravagna Institute of Cancer Research, UK
Paolo Cazzaniga University of Bergamo, Italy
Davide Chicco Peter Munk Cardiac Centre, Canada
Angelo Ciaramella University of Naples Parthenope, Italy
Luisa Cutillo SITraN, University of Sheffield, UK
Chiara Damiani University of Milano-Bicocca, Italy
Angelo Facchiano CNR, Istituto di Scienze dell’Alimentazione, Italy
Alessandro Filisetti Explora Biotech Srl, Italy
Enrico Formenti University of Nice Sophia Antipolis, France
Christoph M. Friedrich University of Applied Science and Arts Dortmund, Germany

Yair Goldberg University of Haifa, Israel
Alex Graudenzi University of Milano-Bicocca, Italy
Sean Holden University of Cambridge, UK
Gunnar W. Klau Heinrich-Heine-University Düsseldorf, Germany
Johannes Köster University of Duisburg-Essen, Germany
Paola Lecca University of Trento, Italy
Hassan Mahmoud University of Genoa, Italy
Anna Marabotti University of Salerno, Italy
Roberto Marangoni University of Pisa, Italy
Tobias Marschall Saarland University/Max Planck Institute for Informatics, Germany

Giancarlo Mauri University of Milano-Bicocca, Italy
Fabio Mavelli University of Bari “Aldo Moro”, Italy
Pasquale Palumbo IASI-CNR, Italy
Dario Pescini University of Milano-Bicocca, Italy
Leif Peterson Houston Methodist Research Institute, USA
Alberto Policriti University of Udine, Italy
Vilda Purutçuoğlu Middle East Technical University, Turkey
Additional Reviewers

Alqassem, Israa Nouri, Nima
Angaroni, Fabrizio Pucciarelli, Sandra
Femminella, Mauro Ramazzotti, Daniele
Graudenzi, Alex Rautiainen, Mikko
