Advances in Intelligent Systems and Computing

Volume 944

Series Editor
Janusz Kacprzyk, Systems Research Institute, Polish Academy of Sciences, Warsaw, Poland

Advisory Editors
Nikhil R. Pal, Indian Statistical Institute, Kolkata, India
Rafael Bello Perez, Faculty of Mathematics, Physics and Computing, Universidad Central de Las Villas, Santa Clara, Cuba
Emilio S. Corchado, University of Salamanca, Salamanca, Spain
Hani Hagras, Electronic Engineering, University of Essex, Colchester, UK
László T. Kóczy, Department of Automation, Széchenyi István University, Győr, Hungary
Vladik Kreinovich, Department of Computer Science, University of Texas at El Paso, El Paso, TX, USA
Chin-Teng Lin, Department of Electrical Engineering, National Chiao Tung University, Hsinchu, Taiwan
Jie Lu, Faculty of Engineering and Information Technology, University of Technology Sydney, Sydney, NSW, Australia
Patricia Melin, Graduate Program of Computer Science, Tijuana Institute of Technology, Tijuana, Mexico
Nadia Nedjah, Department of Electronics Engineering, University of Rio de Janeiro, Rio de Janeiro, Brazil
Ngoc Thanh Nguyen, Faculty of Computer Science and Management, Wroclaw University of Technology, Wroclaw, Poland
Jun Wang, Department of Mechanical and Automation Engineering, The Chinese University of Hong Kong, Shatin, Hong Kong
The series “Advances in Intelligent Systems and Computing” contains publications on theory, applications, and design methods of Intelligent Systems and Intelligent Computing. Virtually all disciplines such as engineering, natural sciences, computer and information science, ICT, economics, business, e-commerce, environment, healthcare, life science are covered. The list of topics spans all the areas of modern intelligent systems and computing such as: computational intelligence, soft computing including neural networks, fuzzy systems, evolutionary computing and the fusion of these paradigms, social intelligence, ambient intelligence, computational neuroscience, artificial life, virtual worlds and society, cognitive science and systems, Perception and Vision, DNA and immune based systems, self-organizing and adaptive systems, e-Learning and teaching, human-centered and human-centric computing, recommender systems, intelligent control, robotics and mechatronics including human-machine teaming, knowledge-based paradigms, learning paradigms, machine ethics, intelligent data analysis, knowledge management, intelligent agents, intelligent decision making and support, intelligent network security, trust management, interactive entertainment, Web intelligence and multimedia.

The publications within “Advances in Intelligent Systems and Computing” are primarily proceedings of important conferences, symposia and congresses. They cover significant recent developments in the field, both of a foundational and applicable character. An important characteristic feature of the series is the short publication time and world-wide distribution. This permits a rapid and broad dissemination of research results.

** Indexing: The books of this series are submitted to ISI Proceedings, EI-Compendex, DBLP, SCOPUS, Google Scholar and Springerlink **

Advances in Computer Vision

Proceedings of the 2019 Computer Vision Conference (CVC), Volume 2
It gives us the great pleasure to welcome all the participants of the Computer Vision Conference (CVC) 2019, organized by The Science and Information (SAI) Organization, based in the UK. CVC 2019 offers a place for participants to present and to discuss their innovative recent and ongoing research and their applications. The prestigious conference was held on 25–26 April 2019 in Las Vegas, Nevada, USA.

Computer vision is a field of computer science that works on enabling the computers to identify, see and process information in a similar way that humans do and provide an appropriate result. Nowadays, computer vision is developing at a fast pace and has gained enormous attention.

The volume and quality of the technical material submitted to the conference confirm the rapid expansion of computer vision and CVC’s status as its flagship conference. We believe the research presented at CVC 2019 will contribute to strengthen the great success of computer vision technologies in industrial, entertainment, social and everyday applications. The participants of the conference were from different regions of the world, with the background of either academia or industry.

The published proceedings has been divided into two volumes, which covered a wide range of topics in Machine Vision and Learning, Computer Vision Applications, Image Processing, Data Science, Artificial Intelligence, Motion and Tracking, 3D Computer Vision, Deep Learning for Vision, etc. These papers are selected from 371 submitted papers and have received the instruction and help from many experts, scholars and participants in proceedings preparation. Here, we would like to give our sincere thanks to those who have paid great efforts and support during the publication of the proceeding. After rigorous peer review, 118 papers were published including 7 poster papers.

Many thanks go to the Keynote Speakers for sharing their knowledge and expertise with us and to all the authors who have spent the time and effort to contribute significantly to this conference. We are also indebted to the organizing committee for their great efforts in ensuring the successful implementation of the
conference. In particular, we would like to thank the technical committee for their constructive and enlightening reviews on the manuscripts in the limited timescale. We hope that all the participants and the interested readers benefit scientifically from this book and find it stimulating in the process. See you in next SAI Conference, with the same amplitude, focus and determination.

Regards,
Kohei Arai
Contents

Selection of Personnel Based on Multicriteria Decision Making and Fuzzy Logic ........................................... 1
Zapata C. Santiago, Escobar R. Luis, and Lopez N. Ricardo

Data-Driven Multi-step Demand Prediction for Ride-Hailing Services Using Convolutional Neural Network ............ 11
Chao Wang, Yi Hou, and Matthew Barth

Sentiment Classification of User Reviews Using Supervised Learning Techniques with Comparative Opinion Mining Perspective ......................................................... 23
Aurangzeb Khan, Umair Younis, Alam Sher Kundi, Muhammad Zubair Asghar, Irfan Ullah, Nida Aslam, and Imran Ahmed

Asymmetric Laplace Mixture Modelling of Incomplete Power-Law Distributions: Application to ‘Seismicity Vision’ ........ 30
Arnaud Mignan

Iceberg Detection by CNN Based on Incidence-Angle Confusion ...... 44
Yongli Zhu and Chengxi Liu

The Effectiveness of Distinctive Information for Cancer Cell Analysis Through Big Data ........................................ 57
Babu Kaji Baniya and Etienne Z. Gnimpieba

Forecasting Food Sales in a Multiplex Using Dynamic Artificial Neural Networks .............................................. 69
V. Adithya Ganesan, Siddharth Divi, Nithish B. Moudhgalya, Uppu Sriharsha, and Vineeth Vijayaraghavan

Automatic Detection of Vibration Patterns During Production Test of Aircraft Engines ..................................... 81
Jérôme Lacaille, Julien Griffaton, and Mina Abdel-Sayed
Cooperation of Virtual Reality and Real Objects with HoloLens  
Jindřich Čýrus, David Krčmaňík, Michal Petrů, and Jan Kočí  

Ontology of Ubiquitous Learning: WhatsApp Messenger 
Competes Successfully with Learning Management Systems (LMS)  
William Kofi Koomson  

Feature Map Transformation for Multi-sensor Fusion in Object 
Detection Networks for Autonomous Driving 
Enrico Schröder, Sascha Braun, Mirko Mählisch, Julien Vitay, 
and Fred Hamker  

Cross-Safe: A Computer Vision-Based Approach to Make 
All Intersection-Related Pedestrian Signals Accessible for the Visually Impaired 
Xiang Li, Hanzhang Cui, John-Ross Rizzo, Edward Wong, and Yi Fang  

AutoViDev: A Computer-Vision Framework to Enhance 
and Accelerate Research in Human Development 
Ori Ossmy, Rick O. Gilmore, and Karen E. Adolph  

Application of Remote Sensing for Automated Litter Detection 
and Management 
Mark Hamill, Bryan Magee, and Phillip Millar  

Design and Evaluation of a Virtual Reality-Based Car 
Configuration Concept 
Marcus Korinth, Thomas Sommer-Dittrich, Manfred Reichert, 
and Rüdiger Pryss  

Using Computer Vision Techniques for Parking Space Detection in Aerial Imagery 
Andrew Regester and Vamsi Paruchuri  

Hybrid Navigation Information System for Minimally Invasive 
Surgery: Offline Sensors Registration 
Uddhav Bhattarai and Ali T. Alouani  

Seeking Optimum System Settings for Physical Activity 
Recognition on Smartwatches 
Muhammad Ahmad, Adil Khan, Manuel Mazzara, 
and Salvatore Distefano  

SURF Based Copy Move Forgery Detection Using kNN Mapping 
Kelvin Harrison Paul, K. R. Akshatha, A. K. Karunakar, 
and Sharan Seshadri
A Preliminary Approach to Using PRNU Based Transfer Learning for Camera Identification ........................................ 246
Sharan Seshadri, K. R. Akshatha, A. K. Karunakar, and Kelvin Harrison Paul

Accident Recognition via 3D CNNs for Automated Traffic Monitoring in Smart Cities .................................. 256
Mikhail Bortnikov, Adil Khan, Asad Masood Khattak, and Muhammad Ahmad

On Image Based Enhancement for 3D Dense Reconstruction of Low Light Aerial Visual Inspected Environments ............ 265
Christoforos Kanellakis, Petros Karvelis, and George Nikolakopoulos

Robots in Healthcare: A Survey ........................................ 280
Arshia Khan and Yumna Anwar

An Efficient Approach for Detecting Moving Objects and Deriving Their Positions and Velocities ...................... 293
Andreas Gustavsson

Adaptive Fusion of Sub-band Particle Filters for Robust Tracking of Multiple Objects in Video ........................................ 314
Ahmed Mahmoud and Sherif S. Sherif

Human Tracking for Facility Surveillance ................................. 329
Shin-Yi Wen, Yu Yen, and Albert Y. Chen

Near Real-Time Robotic Grasping of Novel Objects in Cluttered Scenes .......................................................... 339
Amirhossein Jabalameli, Nabil Ettehadi, and Aman Behal

Identifying Emerging Trends and Temporal Patterns About Self-driving Cars in Scientific Literature ....................... 355
Workneh Y. Ayele and Imran Akram

Making a Simple Game in Unreal™ Engine: Survival Knight .......... 373
Aamir Jamal and Sudhanshu Kumar Semwal

Towards Approximate Sphere Packing Solutions Using Distance Transformations and Dynamic Logic ...................... 385
Sudhanshu Kumar Semwal, Mike Janzen, John Promersbeger, and Leonid Perlovsky

Automatic Nucleus Segmentation with Mask-RCNN .................... 399
Jeremiah W. Johnson

Stereo Vision Based Object Detection Using V-Disparity and 3D Density-Based Clustering ........................................ 408
