In this part, American healthcare and particularly American radiology is discussed in reference to O.E.C.D data encompassing 34 countries. American radiology residency education is compared with the characteristics of training in Europe. Also two countries with markedly different scales of wealth, Japan and Cuba, are evaluated. Both in their particular context have been successful in the delivery of healthcare and the provision of radiology resources.

Chapter 17—O.E.C.D. Health Data: Where Does the US Stack Up?
Chapter 18—Characteristics of Radiology Training Programs in Europe in Comparison With Those in the United States
Chapter 19—Japan: A Country With a Currently Successful Radiology Model of Health Care
Chapter 20—Radiology in Cuba: A Different Path With Fewer Resources and More Compulsion
Chapter 21—Geography and Radiology: Perfect Together
