Preface

Intelligence and security informatics (ISI) is concerned with the development of advanced information technologies, systems, algorithms, and databases for national, international, and societal security-related applications, through an integrated technological, organizational, and policy-based approach. In the past decade, the ISI community has experienced tremendous growth and contributed new theories, algorithms, and methods to the understanding, monitoring, and prevention of intelligence- and security-related issues.

The Pacific Asia Workshop on Intelligence and Security Informatics (PAISI) provides a platform for the ISI community to present and discuss findings in security-related research. PAISI 2017 was the 12th workshop in the series. In 2006, the First International Workshop on ISI (WISI) was held in Singapore in conjunction with the Pacific Asia Conference on Knowledge Discovery and Data Mining (PAKDD 2006). The workshop attracted over 100 contributors and participants from all over the world and marked the start of a new series of ISI meetings in the Pacific Asia region. In the following few years, the workshop was held in Chengdu, China (2007), Taipei, Taiwan (2008), Bangkok, Thailand (2009), Hyderabad, India (2010), Beijing, China (2011, 2013), Kuala Lumpur, Malaysia (2012), Tainan, Taiwan (2014), Ho Chi Minh City, Vietnam (2015), and Auckland, New Zealand (2016). This year, the Pacific Asia ISI Workshop series (PAISI 2017) was once again held in conjunction with PAKDD 2017 in Jeju, South Korea.

PAISI 2017 brought together ISI researchers from Pacific Asia and other regions working on a variety of fields and provided a stimulating forum for them to exchange ideas and report on their research progress. The one-day program included a keynote speech and presentations of eight long and one short papers, covering such topics as information access and security, cybersecurity and infrastructure protection, data and text mining, and network-based data analytics. We wish to express our sincere gratitude to all workshop Program Committee members, who provided valuable and constructive review comments.

March 2017

Alan Wang
Michael Chau
Hsinchun Chen
Organizing Committee and Program Committee

Workshop Co-chairs

G. Alan Wang  Virginia Tech, USA
Michael Chau    The University of Hong Kong, SAR China
Hsinchun Chen  The University of Arizona, USA

Program Committee

Weiping Chang  Central Police University, Taiwan
Xueqi Cheng    Chinese Academy of Sciences, China
Vlad Estivill-Castro  Griffith University, Australia
Uwe Glässer  Simon Fraser University, Canada
Daniel Hughes  Massey University, New Zealand
Eul Gyu Im    Hanyang University, South Korea
Da-Yu Kao      Central Police University, Taiwan
Siddharth Kaza  Towson University, USA
Paul Kwan      University of New England, USA
Wai Lam        The Chinese University of Hong Kong, SAR China
Mark Last      Ben-Gurion University of the Negev, Israel
Ickjai Lee     James Cook University, Australia
Xin Li         City University of Hong Kong, SAR China
Hsin-Min Lu    National Taiwan University, Taiwan
Xin Luo        University of New Mexico, USA
Byron Marshall  Oregon State University, USA
Dorbin Ng      The Chinese University of Hong Kong, SAR China
Shaojie Qiao   Southwest Jiaotong University, China
Srinath Srinivasa  International Institute of Information Technology, Bangalore, India
Aixin Sun      Nanyang Technological University, Singapore
Paul Thompson  Dartmouth College, USA
Harry Wang     University of Delaware, USA
Jau-Hwang Wang  Central Police University, Taiwan
Jennifer Xu     Bentley University, USA
Liao You-Lu    Central Police University, Taiwan
Yilu Zhou       Fordham University, USA
Contents

Cybersecurity and Infrastructure Protection

The Cyberbullying Assessment of Capable Guardianship in Routine Activity Theory ......................................................... 3
Da-Yu Kao, Benjamaporn Kluaypa, and Hung-Chih Lin

The Hierarchy of Cyber War Definitions ........................................ 15
Daniel Hughes and Andrew Colarik

Differentiating the Investigation Response Process of Cyber Security Incident for LEAs .................................................. 34
Shou-Ching Hsiao and Da-Yu Kao

‘Security Theater’: On the Vulnerability of Classifiers to Exploratory Attacks .................................................... 49
Tegjyot Singh Sethi, Mehmed Kantardzic, and Joung Woo Ryu

Network-Based Data Analytics

A Structural Based Community Similarity Algorithm and Its Application in Scientific Event Detection ........................................ 67
Xiangfeng Meng, Yunhai Tong, Xinhai Liu, Yiren Chen, and Shaohua Tan

Link Prediction in Temporal Heterogeneous Networks ...................... 83
T. Jaya Lakshmi and S. Durga Bhavani

NetRating: Credit Risk Evaluation for Loan Guarantee Chain in China .... 99
Xiangfeng Meng, Yunhai Tong, Xinhai Liu, Yiren Chen, and Shaohua Tan

Information Access and Security

VQ Coding in Data Hiding Using Correlated Neighboring Blocks in Security Performance .................................................. 111
Cheng-Ta Huang, De-En Sun, Yen-Lin Chen, and Shiu-Jeng Wang

Idology and Its Applications in Public Security and Network Security .... 129
Shenghui Su, Jianhua Zheng, Shuwang Lü, Zhiqiu Huang, Zhoujun Li, and Zhenmin Tang

Author Index ........................................................................ 151
