Preface

The 11th International Conference on Network and System Security (NSS-2017) was held in Helsinki, Finland, during August 21–23, 2017. It was hosted by Aalto University and co-hosted by the following university, institutes, and organizations: Xidian University, State Key Laboratory of Integrated Services Networks of Xidian University, Federation of Finnish Learned Societies, TEKES – the Finnish Funding Agency for Innovation, and the National 111 Project on Mobile Internet Security (Xidian University). We would like to express our sincere thanks to these hosts and foundations for their great support. Special thanks go to Nokia for the Gold Patron support of the conference.

The NSS conference series is an established forum that brings together researchers and practitioners to provide a confluence of network and system security technologies, including all theoretical and practical aspects. In previous years, NSS took place in Taipei (2016), New York City, USA (2015), Xi’an, China (2014), Madrid, Spain (2013), Wu Yi Shan, China (2012), Milan, Italy (2011), Melbourne, Australia (2010), Gold Coast, Australia (2009), Shanghai, China (2008), and Dalian, China (2007).

This year the conference received 83 submissions. All the submissions were reviewed on the basis of their significance, novelty, technical quality, presentation, and practical impact. After careful reviews by at least two experts in the relevant areas for each paper, and intensive discussions by the Program Committee (PC) members, 24 papers were selected for presentation at the conference and included in this Springer volume, with an acceptance rate 28.9%. The accepted papers cover multiple topics in network and system security. Besides the regular paper presentations, the program of the conference included eight interesting and insightful keynotes addressed by Prof. Elisa Bertino, Purdue University, USA, Prof. Francisco Herrera, University of Granada, Spain, Dr. Chonggang Wang, InterDigital, USA, Dr. Anand Prasad, NEC Corporation, Japan, Prof. Yang Xiang, Deakin University, Australia, Prof. Laurence T. Yang, St. Francis Xavier University, Canada, and Mr. Tatu Ylönen, SSH Communications Security, USA, and Vice President of Research and Technology, Lauri Oksanen of Nokia Bell Labs. We would like to express our special thanks to the keynote speakers.

The NSS 2017 program also included four workshops: the Third International Workshop on 5G Security and Machine Learning (IW5GS-2017), the International Workshop on Security Measurements of Cyber Networks (SMCN-2017), the International Workshop on Security in Big Data (SECBD-2017), and the Second International Workshop on Security of the Internet of Everything (SecIoE-2017). They respectively focused on 5G security and machine learning, security measurements of cyber networks, security in big data, and security of Internet of Everything. We would like to express our special appreciation to the workshop chairs: Dr. Silke Holtmanns, Prof. Yuqing Zhang, and Dr. Xin Huang.

NSS 2017 was made possible by the joint effort of numerous people and organizations worldwide. There is a long list of people who volunteered their time and energy
to put together the conference and who deserve special thanks. First and foremost, we are deeply grateful to all the PC members for their great efforts in reading, commenting, debating, and finally selecting the papers. We also thank all the external reviewers for assisting the Technical PC in their particular areas of expertise.

We thank the honorary chair, Prof. Hui Li, Xidian University, China, for his kind support on the conference organization. We would like to emphasize our gratitude to the general chairs, Prof. Raimo Kantola, Prof. Valtteri Niemi, and Prof. Athanasios V. Vasilakos, for their generous support and leadership to ensure the success of the conference. We deeply appreciate Miss Wenxiu Ding’s assistance in the conference organization. Thanks also go to the: panel chair, Yan Zhang; publicity chair, Dr Li Yang; Steering Committee, Prof. Elisa Bertino, Prof. Robert H. Deng, Prof. Dieter Gollmann, Prof. Xinyi Huang, Prof. Kui Ren, Prof. Ravi Sandhu, Prof. Yang Xiang, Prof. Wanlei Zhou; Web chairs, Mr. Mingjun Wang, and Mr. Mohsin Muhammad.

We sincerely thank the authors of all submitted papers and all the conference attendees. Thanks are also due to the staff at Springer for their help with producing the proceedings and to the developers and maintainers of the EasyChair software, which greatly helped simplify the submission and review process.

## Contents

### Cloud and IoT Security

A Generic Construction of Secure-Channel Free Searchable Encryption with Multiple Keywords .............................................. 3  
*Keita Emura*

Experiences in Trusted Cloud Computing .............................................. 19  
*Ian Oliver, Silke Holtmanns, Yoan Miche, Shankar Lal, Leo Hippeläinen, Aapo Kalliola, and Sowmya Ravidas*

Private Membership Test Protocol with Low Communication Complexity .............................................. 31  
*Sara Ramezanian, Tommi Meskanen, Masoud Naderpour, and Valtteri Niemi*

Adaptively Secure Hierarchical Identity-Based Encryption over Lattice .............................................. 46  
*Leyou Zhang and Qing Wu*

Risk Modelling of Blockchain Ecosystem .............................................. 59  
*Igor Kabashkin*

### Network Security

Exploiting AUTOSAR Safety Mechanisms to Launch Security Attacks .............................................. 73  
*Ahmad M.K. Nasser, Di Ma, and Sam Lauzon*

CookiesWall: Preventing Session Hijacking Attacks Using Client Side Proxy .............................................. 87  
*Somanath Tripathy and Praveen Kumar*

Mixed Wavelet-Based Neural Network Model for Cyber Security Situation Prediction Using MODWT and Hurst Exponent Analysis .............................................. 99  
*Fannv He, Yuqing Zhang, Donghang Liu, Ying Dong, Caiyun Liu, and Chensi Wu*

Detecting DNS Tunneling Using Ensemble Learning .............................................. 112  
*Saeed Shafieian, Daniel Smith, and Mohammad Zulkernine*

Survey on Big Data Analysis Algorithms for Network Security Measurement .............................................. 128  
*Hanlu Chen, Yulong Fu, and Zheng Yan*
Platform and Hardware Security

A Practical Method to Confine Sensitive API Invocations on Commodity Hardware ........................................... 145
   Donghai Tian, Dingjun Qi, Li Zhan, Yuhang Yin, Changzhen Hu, and Jingfeng Xue

Hardware and Software Support for Transposition of Bit Matrices in High-Speed Encryption ........................................... 160
   Patrick Eitschberger, Jörg Keller, and Simon Holmbacka

An Android Vulnerability Detection System ........................................... 169
   Jiayuan Zhang, Yao Yao, Xiaoji Li, Jian Xie, and Gaofei Wu

DNA-Droid: A Real-Time Android Ransomware Detection Framework ........................................... 184
   Amirhossein Gharib and Ali Ghorbani

Exploring Energy Consumption of Juice Filming Charging Attack on Smartphones: A Pilot Study ........................................... 199
   Lijun Jiang, Weizhi Meng, Yu Wang, Chunhua Su, and Jin Li

Crypto and Others

A Generic yet Efficient Method for Secure Inner Product ........................................... 217
   Lihua Wang, Takuya Hayashi, Yoshinori Aono, and Le Trieu Phong

Randomization Can’t Stop BPF JIT Spray ........................................... 233
   Elena Reshetova, Filippo Bonazzi, and N. Asokan

EEG-Based Random Number Generators ........................................... 248
   Dang Nguyen, Dat Tran, Wanli Ma, and Khoa Nguyen

Safety of ABAC2 Is Decidable ........................................... 257
   Tahmina Ahmed and Ravi Sandhu

Implementation of Bitsliced AES Encryption on CUDA-Enabled GPU ........................................... 273
   Naoki Nishikawa, Hideharu Amano, and Keisuke Iwai

Authentication and Key Management

Cryptanalysis and Improvement of an Identity-Based Proxy Multi-signature Scheme ........................................... 291
   Jayaprakash Kar

The Time Will Tell on You: Exploring Information Leaks in SSH Public Key Authentication ........................................... 301
   Joona Kannisto and Jarmo Harju
Lightweight Deterministic Non Interactive (ni) Hierarchical Key Agreement Scheme (KAS) ............................................ 315
  Pinaki Sarkar

A State Recovery Attack on ACORN-v1 and ACORN-v2 ............... 332
  Deepak Kumar Dalai and Dibyendu Roy

A Quantitative Method for Evaluating Network Security Based on Attack Graph .......................................................... 349
  Yukun Zheng, Kun Lv, and Changzhen Hu

SulleyEX: A Fuzzer for Stateful Network Protocol .......................... 359
  Rui Ma, Tianbao Zhu, Changzhen Hu, Chun Shan, and Xiaolin Zhao

A Detecting Method of Array Bounds Defects Based on Symbolic Execution ................................................................. 373
  Chun Shan, Shiyou Sun, Jingfeng Xue, Changzhen Hu, and Hongjin Zhu

Machine Learning for Analyzing Malware ........................................ 386
  Yajie Dong, Zhenyan Liu, Yida Yan, Yong Wang, Tu Peng, and Ji Zhang

Optimal Attack Path Generation Based on Supervised Kohonen Neural Network ................................................................. 399
  Yun Chen, Kun Lv, and Changzhen Hu

Defenses Against Wormhole Attacks in Wireless Sensor Networks ........ 413
  Rui Ma, Siyu Chen, Ke Ma, Changzhen Hu, and Xiajing Wang

A Systematic Analysis of Random Forest Based Social Media Spam Classification ............................................................. 427
  Mohammed Al-Janabi and Peter Andras

Application Research on Network Attacks and Defenses with Zachman Framework .............................................................. 439
  Chensi Wu, Yuqing Zhang, and Ying Dong

A Novel Approach to Network Security Situation Assessment Based on Attack Confidence .................................................. 450
  Donghang Liu, Lihua Dong, Shaoqing Lv, Ying Dong, Fanny He, Chensi Wu, Yuqing Zhang, and Hua Ma

A Discrete Wavelet Transform Approach to Fraud Detection ............... 464
  Roberto Saia
An Automatic Vulnerabilities Classification Method Based on Their Relevance .................................................. 475
  Hao Zhang, Kun Lv, and Changzhen Hu

A Novel Threat-Driven Data Collection Method for Resource-Constrained Networks ........................................ 486
  Jing Li, Lihua Yin, Yunchuan Guo, Chao Li, Fenghua Li, and Lihua Chen

OE-CP-ABE: Over-Encryption Based CP-ABE Scheme for Efficient Policy Updating ........................................... 499
  Jialu Hao, Jian Liu, Hong Rong, Huimei Wang, and Ming Xian

Privacy-Preserving Stochastic Gradient Descent with Multiple Distributed Trainers ......................................... 510
  Le Trieu Phong

IPsec and IKE as Functions in SDN Controlled Network ......................... 521
  Markku Vajaranta, Joona Kannisto, and Jarmo Harju

Probabilistic Transition-Based Approach for Detecting Application-Layer DDoS Attacks in Encrypted Software-Defined Networks ......................... 531
  Elena Ivannikova, Mikhail Zolotukhin, and Timo Hämäläinen

Concealing IMSI in 5G Network Using Identity Based Encryption ........ 544
  Mohsin Khan and Valtteri Niemi

A Formal Approach for Network Security Policy Relevancy Checking .... 555
  Fakher Ben Ftima, Kamel Karoui, and Henda Ben Ghezala

Area-Dividing Route Mutation in Moving Target Defense Based on SDN . . . 565
  Huiting Tan, Chaojing Tang, Chen Zhang, and Shaolei Wang

Covert Channels Implementation and Detection in Virtual Environments . . . 575
  Irina Mihai, Cătălin Leordeanu, and Alecsandru Pătrașcu

Subscriber Profile Extraction and Modification via Diameter Interconnection ................................... 585
  Silke Holtmanns, Yoan Miche, and Ian Oliver
5G Slicing as a Tool to Test User Equipment Against Advanced Persistent Threats ................................................................. 595
Lauri Isotalo

Mind Your Right to Know: On De-anonymization Auditability in V2X Communications ......................................................... 604
Tommi Meskanen, Masoud Naderpour, and Valtteri Niemi

2nd International Workshop on Security of the Internet of Everything (SECIOE-2017)

A Denial of Service Attack Method for IoT System in Photovoltaic Energy System ................................................................. 613
Lulu Liang, Kai Zheng, Qiankun Sheng, Wei Wang, Rong Fu, and Xin Huang

Improving Alert Accuracy for Smart Vehicles ................................................. 623
Chia-Mei Chen, Gu-Hsin Lai, Yen-Chih Kuo, and Tan-Ho Chang

Hardware Secured, Password-based Authentication for Smart Sensors for the Industrial Internet of Things ........................................ 632
Thomas W. Pieber, Thomas Ulz, Christian Steger, and Rainer Matischek

Towards Dependably Detecting Geolocation of Cloud Servers ................ 643
Leo Hippelainen, Ian Oliver, and Shankar Lal

Tor De-anonymisation Techniques ............................................................. 657
Juha Nurmi and Mikko S. Niemelä

Coincer: Decentralised Trustless Platform for Exchanging Decentralised Cryptocurrencies ..................................................... 672
Michal Zima

Enhancing Resilience of KPS Using Bidirectional Hash Chains and Application on Senosnet ....................................................... 683
Deepak Kumar Dalai and Pinaki Sarkar

μShield: Configurable Code-Reuse Attacks Mitigation For Embedded Systems ................................................................. 694
Ali Abbasi, Jos Wetzel, Wouter Bokslag, Emmanuele Zambon, and Sandro Etalle

A Role-Based Access Control System for Intelligent Buildings ............. 710
Nian Xue, Chenglong Jiang, Xin Huang, and Dawei Liu

Access Control Model for AWS Internet of Things .............................. 721
Smriti Bhatt, Farhan Patwa, and Ravi Sandhu
Privacy Verification Chains for IoT .......................... 737  
Noria Foukia, David Billard, and Eduardo Solana

Platform for Detection of Holes in the Bogotá D.C. Road Network  
and Exposure of the Information in a Web Environment .......... 753  
Rendon Sánchez Angel Mecías, Salcedo Parra Octavio José,  
and Correa Sánchez Lewys
