Real-Time and Embedded Computing Systems and Applications

9th International Conference, RTCSA 2003
Tainan City, Taiwan, ROC, February 18-20, 2003
Revised Papers
Preface

This volume contains the 37 papers presented at the 9th International Conference on Real-Time and Embedded Computing Systems and Applications (RTCSA 2003). RTCSA is an international conference organized for scientists and researchers from both academia and industry to hold intensive discussions on advancing technologies topics on real-time systems, embedded systems, ubiquitous/pervasive computing, and related topics. RTCSA 2003 was held at the Department of Electrical Engineering of National Cheng Kung University in Taiwan. Paper submissions were well distributed over the various aspects of real-time computing and embedded system technologies. There were more than 100 participants from all over the world.

The papers, including 28 regular papers and 9 short papers are grouped into the categories of scheduling, networking and communication, embedded systems, pervasive/ubiquitous computing, systems and architectures, resource management, file systems and databases, performance analysis, and tools and development. The grouping is basically in accordance with the conference program. Earlier versions of these papers were published in the conference proceedings. However, some papers in this volume have been modified or improved by the authors, in various aspects, based on comments and feedback received at the conference. It is our sincere hope that researchers and developers will benefit from these papers.

We would like to thank all the authors of the papers for their contribution. We thank the members of the program committee and the reviewers for their excellent work in evaluating the submissions. We are also very grateful to all the members of the organizing committees for their help, guidance and support. There are many other people who worked hard to make RTCSA 2003 a success. Without their efforts, the conference and this volume would not have been possible, and we would like to express our sincere gratitude to them. In addition, we would like to thank the National Science Council (NSC), the Ministry of Education (MOE), and the Institute of Information Science (IIS) of Academia Sinica of Taiwan, the Republic of China (ROC) for their generous financial support. We would also like to acknowledge the co-sponsorship by the Information Processing Society of Japan (IPSJ) and the Korea Information Science Society (KISS).

Last, but not least, we would like to thank Dr. Farn Wang who helped initiate contact with the editorial board of LNCS to publish this volume. We also appreciate the great work and the patience of the editors at Springer-Verlag. We are truly grateful.

Jing Chen and Seongsoo Hong
History and Future of RTCSA

The International Conference on Real-Time and Embedded Computing Systems and Applications (RTCSA) aims to be a forum on the trends as well as innovations in the growing areas of real-time and embedded systems, and to bring together researchers and developers from academia and industry for advancing the technology of real-time computing systems, embedded systems and their applications. The conference assumes the following goals:

– to investigate advances in real-time and embedded systems;
– to promote interactions among real-time systems, embedded systems and their applications;
– to evaluate the maturity and directions of real-time and embedded system technology;
– to bridge research and practising experience in the communities of real-time and embedded systems.

RTCSA started from 1994 with the International Workshop on Real-Time Computing Systems and Applications held in Korea. It evolved into the International Conference on Real-Time Computing Systems and Applications in 1998. As embedded systems is becoming one of the most vital areas of research and development in computer science and engineering, RTCSA changed into the International Conference on Real-Time and Embedded Computing Systems and Applications in 2003. In addition to embedded systems, RTCSA has expanded its scope to cover topics on pervasive and ubiquitous computing, home computing, and sensor networks. The proceedings of RTCSA from 1995 to 2000 are available from IEEE. A brief history of RTCSA is listed below. The next RTCSA is currently being organized and will take place in Sweden.

Organization of RTCSA 2003

The 9th International Conference on Real-Time and Embedded Computing Systems and Applications (RTCSA 2003) was organized, in cooperation with the Information Processing Society of Japan (IPSJ) and the Korea Information Science Society (KISS), by the Department of Electrical Engineering, National Cheng Kung University in Taiwan, Republic of China (ROC).

Honorary Chair
Chiang Kao President of National Cheng Kung University

General Co-chairs
Ruei-Chuan Chang National Chiao Tung University (Taiwan)
Tatsuo Nakajima Waseda University (Japan)

Steering Committee
Tei-Wei Kuo National Taiwan University (Taiwan)
Insup Lee University of Pennsylvania (USA)
Jane Liu Microsoft (USA)
Seung-Kyu Park Ajou University (Korea)
Heonshik Shin Seoul National University (Korea)
Kang Shin University of Michigan at Ann Arbor (USA)
Sang H. Son University of Virginia (USA)
Kenji Toda ITRI., AIST (Japan)
Hideyuki Tokuda Keio University (Japan)

Advisory Committee
Alan Burns University of York (UK)
Jan-Ming Ho IIS, Academia Sinica (Taiwan)
Aloysius K. Mok University of Texas, Austin (USA)
Heonshik Shin Seoul National University (Korea)
John A. Stankovic University of Virginia (USA)
Hideyuki Tokuda Keio University (Japan)
Jhing-Fa Wang National Cheng Kung University (Taiwan)

Publicity Co-chairs
Lucia Lo Bello University of Catania (Italy)
Victor C.S. Lee City University of Hong Kong (Hong Kong)
Daeyoung Kim Information and Communications University (Korea)
Sang H. Son University of Virginia (USA)
Kazunori Takashio Keio University (Japan)
Program Co-chairs

Jing Chen  National Cheng Kung University (Taiwan)
Seongsoo Hong  Seoul National University (Korea)

Program Committee

Giorgio C. Buttazzo  University of Pavia (Italy)
Jörgen Hansson  Linkoping University (Sweden)
Pao-Ann Hsiung  National Chung Cheng University (Taiwan)
Chih-Wen Hsueh  National Chung Cheng University (Taiwan)
Dong-In Kang  ISI East, USC (USA)
Daeyoung Kim  Information and Communications University (Korea)
Moon Hae Kim  Konkuk University (Korea)
Tae-Hyung Kim  Hanyang University (Korea)
Young-kuk Kim  Chungnam National University (Korea)
Lucia Lo Bello  University of Catania (Italy)
Kam-Yiu Lam  City University of Hong Kong (Hong Kong)
Chang-Gun Lee  Ohio State University (USA)
Victor C.S. Lee  City University of Hong Kong (Hong Kong)
Yann-Hang Lee  Arizona State University (USA)
Kwei-Jay Lin  University of California, Irvine (USA)
Sang Lyul Min  Seoul National University (Korea)
Tatsuo Nakajima  Waseda University (Japan)
Yukikazu Nakamoto  NEC, Japan (Japan)
Joseph Ng  Hong Kong Baptist University (Hong Kong)
Nimal Nissanke  South Bank University (UK)
Raj Rajkumar  Carnegie Mellon University (USA)
Krithi Ramamritham  India Institute of Technology, Bombay (India)
Ichiro Satoh  National Institute of Informatics (Japan)
Lui Sha  University of Illinois at Urbana-Champaign (USA)
Wei-Kuan Shih  National Tsing Hua University (Taiwan)
LihChyun Shu  National Cheng Kung University (Taiwan)
Sang H. Son  University of Virginia (USA)
Hiroaki Takada  Toyohashi University of Technology (Japan)
Yoshito Tobe  Tokyo Denki University (Japan)
Hans Toetenel  Delft University of Technology (Netherlands)
Farn Wang  National Taiwan University (Taiwan)
Andy Wellings  University of York (UK)
Wang Yi  Uppsala University (Sweden)

Reviewers

Lucia Lo Bello  Giorgio C. Buttazzo  Jing Chen  Jörgen Hansson  Seongsoo Hong  Chih-Wen Hsueh  Dong-In Kang  Daeyoung Kim  Pao-Ann Hsiung  Chih-Wen Hsueh  Dong-In Kang  Daeyoung Kim

# Table of Contents

## Scheduling

Scheduling-Aware Real-Time Garbage Collection Using Dual Aperiodic Servers ............................................................................................................. 1  
*Taehyoun Kim, Heonshik Shin*

On the Composition of Real-Time Schedulers ............................................. 18  
*Weirong Wang, Aloysius K. Mok*

An Approximation Algorithm for Broadcast Scheduling in Heterogeneous Clusters ............................................................................................ 38  
*Pangfeng Liu, Da-Wei Wang, Yi-Heng Guo*

Scheduling Jobs with Multiple Feasible Intervals ......................................... 53  
*Chi-sheng Shih, Jane W.S. Liu, Infan Kuok Cheong*

Deterministic and Statistical Deadline Guarantees for a Mixed Set of Periodic and Aperiodic Tasks .................................................................. 72  
*Minsoo Ryu, Seongsoo Hong*

Real-Time Disk Scheduling with On-Disk Cache Conscious ......................... 88  
*Hsung-Pin Chang, Ray-I Chang, Wei-Kuan Shih, Ruei-Chuan Chang*

Probabilistic Analysis of Multi-processor Scheduling of Tasks with Uncertain Parameters ................................................................. 103  
*Amare Leulseged, Nimal Nissanke*

Real-Time Virtual Machines for Avionics Software Porting and Development .................................................................................. 123  
*Lui Sha*

Algorithms for Managing QoS for Real-Time Data Services Using Imprecise Computation ................................................................. 136  
*Mehdi Amirijoo, Jörgen Hansson, Sang H. Son*

## Networking and Communication

On Soft Real-Time Guarantees on Ethernet ................................................ 158  
*Min-gyu Cho, Kang G. Shin*

BondingPlus: Real-Time Message Channel in Linux Ethernet Environment Using Regular Switching Hub ..................................................... 176  
*Hsin-hung Lin, Chih-wen Hsueh, Guo-Chiuan Huang*
