Preface

These proceedings contain a selection of refereed papers presented at or related to the 3rd Annual Workshop of the Types Working Group (Computer-Assisted Reasoning Based on Type Theory, EU IST project 29001), which was held during April 30 to May 4, 2003, in Villa Gualino, Turin, Italy. The workshop was attended by about 100 researchers. Out of 37 submitted papers, 25 were selected after a refereeing process. The final choices were made by the editors.

Two previous workshops of the Types Working Group under EU IST project 29001 were held in 2000 in Durham, UK, and in 2002 in Berg en Dal (close to Nijmegen), The Netherlands. These workshops followed a series of meetings organized in the period 1993–2002 within previous Types projects (ESPRIT BRA 6435 and ESPRIT Working Group 21900). The proceedings of these earlier workshops were also published in the LNCS series, as volumes 806, 996, 1158, 1512, 1657, 2277, and 2646. ESPRIT BRA 6453 was a continuation of ESPRIT Action 3245, Logical Frameworks: Design, Implementation and Experiments. Proceedings for annual meetings under that action were published by Cambridge University Press in the books “Logical Frameworks”, and “Logical Environments”, edited by G. Huet and G. Plotkin.

We are very grateful to the members of the research group “Semantics and Logics of Computation” of the Computer Science Department of the University of Turin, who helped organize the Types 2003 meeting in Torino. We especially want to thank Daniela Costa and Claudia Goggioli for the secretarial support, Sergio Rabellino for the technical support, and Ugo de’ Liguoro for helping out in various ways.

We also acknowledge the support from the Types Project, EU IST 29001, which makes the Types workshops possible.

March 2004

Stefano Berardi
Mario Coppo
Ferruccio Damiani
Referees

We would like to thank the following people for their kind work in reviewing the papers submitted to these proceedings:

Michael Abbott
Peter Aczel
Robin Adams
Yohji Akama
Fabio Alessi
Thorsten Altenkirch
Chris Andersen
Steffen van Bakel
Clemens Ballarin
Franco Barbanera
Gianpaolo Bella
Gianluigi Bellin
Stefano Berardi
Chantal Berline
Yves Bertot
Frédéric Blanqui
Kim Bruce
Iliano Cervesato
Alberto Ciaffaglione
Norman Danner
Ugo de Liguoro
Fer-Jan de Vries
Pietro Di Gianantonio
Peter Dybjer
Maribel Fernandez
Jean-Christophe Filliatre
Matthew Flatt
Daniel Fridlender
Herman Geuvers

# Table of Contents

A Modular Hierarchy of Logical Frameworks ................................ 1
*Robin Adams*

Tailoring Filter Models .......................................................... 17
*Fabio Alessi, Franco Barbanera, Mariangiola Dezani-Ciancaglini*

Locales and Locale Expressions in Isabelle/Isar .................... 34
*Clemens Ballarin*

Introduction to PAF!, a Proof Assistant for ML Programs Verification ... 51
*Sylvain Baro*

A Constructive Proof of Higman’s Lemma in Isabelle .................... 66
*Stefan Berghofer*

A Core Calculus of Higher-Order Mixins and Classes .................... 83
*Lorenzo Bettini, Viviana Bono, Silvia Likavec*

Type Inference for Nested Self Types ...................................... 99
*Viviana Bono, Jerzy Tiuryn, Paweł Urzyczyn*

Inductive Families Need Not Store Their Indices ...................... 115
*Edwin Brady, Conor McBride, James McKinna*

Modules in Coq Are and Will Be Correct .................................. 130
*Jacek Chrząszcz*

Rewriting Calculus with Fixpoints:
Untyped and First-Order Systems ......................................... 147
*Horatiu Cirstea, Luigi Liquori, Benjamin Wack*

First-Order Reasoning in the Calculus of Inductive Constructions ...... 162
*Pierre Corbineau*

Higher-Order Linear Ramified Recurrence ................................. 178
*Ugo Dal Lago, Simone Martini, Luca Roversi*

Confluence and Strong Normalisation
of the Generalised Multiary λ-Calculus .................................. 194
*José Espírito Santo, Luís Pinto*

Wellfounded Trees and Dependent Polynomial Functors ............... 210
*Nicola Gambino, Martin Hyland*

Classical Proofs, Typed Processes, and Intersection Types ............ 226
*Silvia Ghilezan, Pierre Lescanne*
“Wave-Style” Geometry of Interaction Models in Rel Are Graph-Like Lambda-Models ........................................ 242
Furio Honsell, Marina Lenisa

Coercions in Hindley-Milner Systems ................................ 259
Robert Kießling, Zhaohui Luo

Combining Incoherent Coercions for $\Sigma$-Types ............... 276
Yong Luo, Zhaohui Luo

Induction and Co-induction in Sequent Calculus .................. 293
Alberto Momigliano, Alwen Tiu

QArith: Coq Formalisation of Lazy Rational Arithmetic .......... 309
Milad Niqui, Yves Bertot

Mobility Types in Coq ............................................ 324
Furio Honsell, Ivan Scagnetto

Some Algebraic Structures in Lambda-Calculus with Inductive Types .................................................. 338
Sergej Soloviev, David Chemouil

A Concurrent Logical Framework: The Propositional Fragment .... 355
Kevin Watkins, Iliano Cervesato, Frank Pfenning, David Walker

Formal Proof Sketches ............................................. 378
Freek Wiedijk

Applied Type System ............................................... 394
Hongwei Xi

Author Index ......................................................... 409
