Object-Oriented Technology

ECOOP 2003 Workshop Reader

ECOOP 2003 Workshops
Darmstadt, Germany, July 21-25, 2003
Final Reports

Springer
Preface

This volume represents the seventh edition of the ECOOP Workshop Reader, a compendium of workshop reports from the 17th European Conference on Object-Oriented Programming (ECOOP 2003), held in Darmstadt, Germany, during July 21–25, 2003.

The workshops were held during the first two days of the conference. They cover a wide range of interesting and innovative topics in object-oriented technology and offered the participants an opportunity for interaction and lively discussion. Twenty-one workshops were selected from a total of 24 submissions based on their scientific merit, the actuality of the topic, and their potential for a lively interaction. Unfortunately, one workshop had to be cancelled.

Special thanks are due to the workshop organizers who recorded and summarized the discussions. We would also like to thank all the participants for their presentations and lively contributions to the discussion: they made this volume possible. Last, but not least, we wish to express our appreciation to the members of the organizing committee who put in countless hours setting up and coordinating the workshops.

We hope that this snapshot of current object-oriented technology will prove stimulating to you.

October 2003

Frank Buschmann
Alejandro Buchmann
Mariano Cilia
Organization

ECOOP 2003 was organized by the Software Technology Group, Department of Computer Science, Darmstadt University of Technology under the auspices of AITO (Association Internationale pour les Technologies Objets) in cooperation with ACM SIGPLAN.

The proceedings of the main conference were published as LNCS 2743.

Workshop Chairs

Frank Buschmann (Siemens Corporate Technology, Germany)
Alejandro Buchmann (Darmstadt University of Technology, Germany)
# Table of Contents

Exception Handling in Object Oriented Systems: Towards Emerging Application Areas and New Programming Paradigms ........................................... 1  
  Alexander Romanovsky, Christophe Dony, Anand Tripathi,  
  Jørgen Lindskov Knudsen

Parallel Object-Oriented Scientific Computing Today .................. 11  
  Kei Davis, Jörg Striegnitz

Communication Abstractions for Distributed Systems .................. 17  
  Antoine Beugnard, Ludger Fiege, Robert Filman, Eric Jul,  
  Salah Sadou

.NET: The Programmer’s Perspective ....................................... 30  
  Hans-Jürgen Hoffmann

Component-Oriented Programming ......................................... 34  
  Jan Bosch, Clemens Szyperski, Wolfgang Weck

Workshop for PhD Students in Object Oriented Programming ........... 50  
  Pedro J. Clemente, Miguel A. Pérez, Sergio Lujan, Hans Reiser

Formal Techniques for Java-Like Programs .............................. 62  
  Susan Eisenbach, Gary T. Leavens, Peter Müller,  
  Arnd Poetzsch-Heffter, Erik Poll

Object-Oriented Reengineering .............................................. 72  
  Serge Demeyer, Stéphane Ducasse, Kim Mens, Adrian Trifu,  
  Rajesh Vasa, Filip Van Rysselberghé

Mobile Object Systems: Resource-Aware Computation ................. 86  
  Ciarán Bryce, Crzegorz Czajkowski

Quantitative Approaches in Object-Oriented Software Engineering ...... 92  
  Fernando Brito e Abreu, Mario Piattini, Geert Poels,  
  Houari A. Sahraoui

Composition Languages ..................................................... 107  
  Markus Lumpe, Jean-Guy Schneider, Bastiaan Schönhage,  
  Markus Bauer, Thomas Genssler

Tools and Environments for Learning Object-Oriented Concepts ....... 119  
  Isabel Michiels, Jürgen Börstler, Kim B. Bruce,  
  Alejandro Fernández
