Editors’ Note

Until now, knowledge visualization and information visualization investigated the question of visualization from different perspectives. However, as there are some common areas of interest, synergy effects can be expected. In an international workshop titled “Visual Artefacts for the Organization of Information and Knowledge. Searching for Synergies” held in May 2004 at the Knowledge Media Research Center in Tuebingen (Germany), leading-edge researchers tackled the problem of looking for synergies. This book explores the approaches of most of the workshop participants, as well as other invited experts.

The intention of the book is to advance current research and development in the fields of knowledge and information visualization, to push the borders of what is now feasible and applicable to develop synergistic approaches that may represent both knowledge and information in a comprehensive manner.

The editors are indebted to the authors who contributed to the book, to Margot Stoll, who did the layout and formatted the papers, to Waltraud Lenz who checked the references, and to Sebastian Groteloh who assisted in solving technical problems.

March 2005

# Table of Contents

**Visualizing Knowledge and Information: An Introduction**  
*Tanja Keller, Sigmar-Olaf Tergan* .......................................................... 1

**Background**

Visual Queries: The Foundation of Visual Thinking  
*Colin Ware* ............................................................................................ 27

Representational Correspondence as a Basic Principle of Diagram Design  
*Christopher F. Chabris, Stephen M. Kosslyn* ........................................ 36

**Knowledge Visualization**

Node-Link Mapping Principles for Visualizing Knowledge and Information  
*Donald F. Dansereau* ............................................................................ 61

Tools for Representing Problems and the Knowledge Required to Solve Them  
*David H. Jonassen* ................................................................................ 82

Collaborative Knowledge Visualization for Cross-Community Learning  
*Jasminko Novak, Michael Wurst* .......................................................... 95

**Information Visualization**

Modeling Interactive, 3-Dimensional Information Visualizations Supporting Information Seeking Behaviors  
*Gerald Jaeschke, Martin Leissler, Matthias Hemmje* ............................. 119

Visualizing Information in Virtual Space: Prospects and Pitfalls  
*Marc M. Sebrechts* ................................................................................ 136

The Impact of Dimensionality and Color Coding of Information Visualizations on Knowledge Acquisition  
*Tanja Keller, Matthias Grimm* ................................................................ 167

**Synergies**

Visualizing Knowledge and Information for Fostering Learning and Instruction  
*Sigmar-Olaf Tergan* .............................................................................. 185
Concept Maps: Integrating Knowledge and Information Visualization
Alberto J. Cañas, Roger Carff, Greg Hill, Marco Carvalho, Marco Arguedas, Thomas C. Eskridge, James Lott, Rodrigo Carvajal ................................................................. 205

Comprehensive Mapping of Knowledge and Information Resources: The Case of Webster
Sherman R. Alpert .................................................................................. 220

Towards a Framework and a Model for Knowledge Visualization: Synergies Between Information and Knowledge Visualization
Remo Aslak Burkhard ............................................................................ 238

ParIS – Visualizing Ideas and Information in a Resource-Based Learning Scenario
Anja Neumann, Wolfgang Gräber, Sigmar-Olaf Tergan ........................... 256

Knowledge-Oriented Organization of Information for Fostering Information Use

LEO: A Concept Map Based Course Visualization Tool for Instructors and Students
John W. Coffey ................................................................................. 285

Navigating Personal Information Repositories with Weblog Authoring and Concept Mapping
Sebastian Fiedler, Priya Sharma .......................................................... 302

Facilitating Web Search with Visualization and Data Mining Techniques
Young-Jin Lee .................................................................................... 326

The Role of Content Representations in Hypermedia Learning: Effects of Task and Learner Variables
Jean-Francois Rouet, Hervé Potelle, Antonine Goumi ................................ 343

Supporting Self-regulated E-Learning with Visual Top-Map-Navigation
Andreas Rittershofer ........................................................................... 355

Information and Knowledge Visualization in Development and Use of a Management Information System (MIS) for DaimlerChrysler – A Visualized Dialogue and Participation Process
Hans-Jürgen Frank, Johannes Drosdol .................................................. 364

Author Index ...................................................................................... 385
