This volume contains the proceedings of ICTAC 2005, the second ICTAC, 

ICTAC was founded by the International Institute for Software Technology of the United Nations University (UNU-IIST) to serve as a forum for practitioners, lecturers and researchers from academia, industry and government who are interested in theoretical aspects of computing and rigorous approaches to software engineering. The colloquium is aimed particularly, but not exclusively, at participants from developing countries. We believe that this will help developing countries to strengthen their research, teaching and development in computer science and engineering, improve the links between developing countries and developed countries, and establish collaboration in research and education. By providing a venue for the discussion of common problems and their solutions, and for the exchange of experiences and ideas, this colloquium supports research and development in computer science and software technology. ICTAC is attracting more and more attention from more and more countries.

Topics covered by ICTAC include:

- automata theory and formal languages,
- principles and semantics of programming languages,
- logic and its applications,
- software architectures and their description languages,
- software specification, refinement and verification,
- model checking and theorem proving,
- formal techniques in software testing,
- models of object and component systems,
- coordination and feature interaction,
- integration of formal and engineering methods,
- service-oriented and document-driven development,
- models of concurrency, security and mobility,
- theory of parallel, distributed and Internet-based (grid) computing,
- real-time and embedded systems,
- type and category theory in computer science.

Research papers in these topics are always considered by ICTAC.

ICTAC 2005 received 122 paper submissions from 29 countries, and accepted 35 papers. We would like to thank the authors of all submitted papers.

Selecting papers for a program from the large number of submissions in a fair and competent manner is a hard job. Luckily, ICTAC 2005 had an excellent Program Committee with highly qualified members from diverse backgrounds to carry out the job. Each submission was reviewed carefully by at least three referees working in relevant fields. Borderline papers were further discussed during an intensive on-line meeting of the Program Committee. We believe that
the program resulting from this excellent job of the Program Committee was scientifically very strong. In addition to the contributed papers, the proceedings also include contributions from invited speakers: Reiko Heckel, Zhiming Liu, José Meseguer, Rocco De Nicola, and Do Long Van.

Five tutorials were selected as affiliated events of ICTAC 2005. The abstracts of the tutorials are also included in the proceedings. We express our thanks to all of the people who submitted tutorial proposals.

Special thanks are due to the Program Committee members and all the referees, whose names are listed on the following pages, for their assistance in reviewing and selecting papers. The help from the Advisory Committee, especially Zhiming Liu, was invaluable. We express our appreciation to the Organizing Committee, especially Ho Si Dam, Le Hai Khoi, Le Quoc Hung and Bui The Duy, and the Publicity Chair, Bernhard Aichernig, for their efforts in making ICTAC 2005 such a successful and enjoyable event. We would particularly like to thank Kitty Iok Sam Chan of UNU-IIST for her hard work in maintaining the conference administration system. We would also like to express our thanks to all UNU-IIST staff for their active support of ICTAC 2005. Last but not least we are grateful to Springer for its helpful collaboration and quick publication.

October 2005

Dang Van Hung and Martin Wirsing
ICTAC 2005 was organized by the International Institute for Software Technology of the United Nations University, the College of Technology of the Vietnam National University, Hanoi, and the Institute of Information Technology of the Vietnam Academy of Science and Technology.

Conference Chairs

Program Co-chair
Dang Van Hung (UNU-IIST, Macau, China)
Martin Wirsing (University of Munich, Germany)

Organizing Committee Co-chair
Ho Si Dam (College of Technology, Vietnam)
Le Hai Khoi (Institute of Information Technology, Vietnam)

Publicity Chair
Bernhard K. Aichernig (UNU-IIST, Macau, China)

Advisory Committee

Dines Bjørner
Technical University of Denmark, Denmark
Manfred Broy
Technische Universität München, Germany
José Luiz Fiadeiro
University of Leicester, UK
Jifeng He
UNU-IIST, Macau, China
Mathai Joseph
TRDDC/TCS, India
Shaoying Liu
Hosei University, Japan
Zhiming Liu
UNU-IIST, Macau, China
Zohar Manna
Stanford University, USA
Tobias Nipkow
Technische Universität München, Germany
Mike Reed
UNU-IIST, Macau, China
Jim Woodcock
York University, UK

Program Committee

Marc Aiguier
University of Evry, France
Keijiro Araki
Kyushu University, Japan
J.O.A. Ayeni
University of Lagos, Nigeria
Jay Bagga
Ball State University, USA
Hubert Baumeister
LMU, Munich, Germany
Michel Bidoit
CNRS & ENS de Cachan, France
Organization IX

P. S. Thiagarajan
Do Long Van
Ji Wang
Mingsheng Ying
Jian Zhang
Hongjun Zheng

NUS, Singapore
Institute of Mathematics, Vietnam
National Laboratory for Parallel
and Distributed Processing, China
Tsinghua University, Beijing, China
Chinese Academy of Sciences, Beijing,
China
Semantics Designs Inc., USA

Referees

Femi Agboola
Luca Aceto
Aderemi O. Adewumi
Bernhard K. Aichernig
Nazareno Aguirre
Jean Philippe Babeau
Diane Bahrami
Riawan Olayinka Basanya
Andreas Bauer
Peter Baumgartner

Vietnam National University, Hanoi  
Vietnam Academy of Science and Technology
## Table of Contents

### Invited Speakers

**A Rewriting Logic Sampler**  
José Meseguer .................................................. 1

**Codes and Length-Increasing Transitive Binary Relations**  
Do Long Van, Kieu Van Hung, Phan Trung Huy ................................. 29

**Languages and Process Calculi for Network Aware Programming – Short Summary**  
Rocco De Nicola ................................................... 49

**Stochastic Analysis of Graph Transformation Systems: A Case Study in P2P Networks**  
Reiko Heckel ....................................................... 53

**Component-Based Software Engineering**  
He Jifeng, Xiaoshan Li, Zhiming Liu ......................................... 70

### Formal Languages

**Outfix-Free Regular Languages and Prime Outfix-Free Decomposition**  
Yo-Sub Han, Derick Wood ........................................... 96

**Solving First Order Formulae of Pseudo-Regular Theory**  
Sébastien Limet, Pierre Pillot ........................................ 110

**Splicing Array Grammar Systems**  
K.G. Subramanian, A. Roslin Sagaya Mary,  
K.S. Dersanambika ...................................................... 125

### Computer Science Logics

**Compositionality of Fixpoint Logic with Chop**  
Naijun Zhan, Jizhao Wu................................................ 136

**An SLD-Resolution Calculus for Basic Serial Multimodal Logics**  
Linh Anh Nguyen .................................................... 151
