Preface

Welcome to the proceedings of APPT 2005: the 6th International Workshop on Advanced Parallel Processing Technologies. APPT is a biennial workshop on parallel and distributed processing. Its scope covers all aspects of parallel and distributed computing technologies, including architectures, software systems and tools, algorithms, and applications. APPT originated from collaborations by researchers from China and Germany and has evolved to be an international workshop. APPT 2005 was the sixth in the series. The past five workshops were held in Beijing, Koblenz, Changsha, Ilmenau, and Xiamen, respectively.

The Program Committee is pleased to present the proceedings for APPT 2005. This year, APPT 2005 received over 220 submissions from researchers all over the world. All the papers were peer reviewed by two to three Program Committee members on their relevance, originality, significance, technical quality, and presentation. Based on the review result, 55 high-quality papers were selected to be included in the proceedings. The papers in this volume represent the forefront of research on parallel processing and related fields by researchers from China, Germany, USA, Korea, India, and other countries. The papers accepted cover a wide range of exciting topics, including architectures, software, networking, and applications.

The excellent program was the result of the hard work and the collective effort of many people and organizations. We would like to express our special thanks to the Architecture Professional Committee of the China Computer Federation (APC-CCF), the Hong Kong Polytechnic University, the National University of Defense Technology, China, and the Harbin Institute of Technology, China. We would like to thank the general chair, Prof. Xingming Zhou, and the general co-chairs, Prof. Xiaodong Zhang and Prof. David Bader, for their great support. Thanks to all members of the Program Committee and all the other reviewers for the time and hard work they put into the thorough reviewing of the large number of papers. We appreciate the keynote speakers, Prof. Francis C.M. Lau and Prof. Kurt Rothermel, for their strong support of the program. We would also like to express our gratitude to Springer for its assistance in putting the proceedings together. Last but not least, our thanks go to the Local Organizing Committee for the great job it did in making the local arrangements and organizing an attractive social program. Without their dedicated help and diligent work, the workshop would not have been so successful.

We would like to take this opportunity to thank all the authors, many of whom traveled great distances to participate in this workshop and make their
valuable contributions. We hope that all participants enjoyed the program and found it worthwhile. We warmly welcome any comments and suggestions to improve our work.

August 2005

Organization

APPT 2005 was organized mainly by the Department of Computing, Hong Kong Polytechnic University and the National University of Defense Technology, China.

Executive Committee

General Chair       Xingming Zhou
                     (Member of Chinese Academy of Sciences,
                      National Lab for Parallel and Distributed
                      Processing, China)

General Vice Co-chairs  Xiaodong Zhang
                        (College of William and Mary, USA)
                        David A. Bader
                        (Georgia Institute of Technology, USA)

Program Co-chairs    Jiannong Cao
                     (Hong Kong Polytechnic University, China)
                     Wolfgang Nejdl
                     (University of Hannover, Germany)

Publicity Chair      Cho-Li Wang
                     (University of Hong Kong, China)

Publication Chair    Laurence T. Yang
                     (St. Francis Xavier University, Canada)

Local Organization Chair  Allan K.Y. Wong
                            (Hong Kong Polytechnic University, China)

Finance/Registration Chair Ming Xu
                         (National Lab for Parallel and Distributed
                         Processing, China)

# Table of Contents

## Keynote Speech

Research Issues in Adapting Computing to Small Devices

*Francis C.M. Lau* ................................................................. 1

Mobile Context-Aware Systems – Linking the Physical and Digital World

*Kurt Rothermel* ................................................................. 2

## Architecture

A Data Transformations Based Approach for Optimizing Memory and Cache Locality on Distributed Memory Multiprocessors

*Xia Jun, Xue-Jun Yang* .......................................................... 3

A Fetch Policy Maximizing Throughput and Fairness for Two-Context SMT Processors

*Caixia Sun, Hongwei Tang, Minxuan Zhang* ............................. 13

A Loop Transformation Using Two Parallel Region Partitioning Method

*Sam Jin Jeong, Jung Soo Han* .................................................. 23

Criticality Based Speculation Control for Speculative Multithreaded Architectures

*Rahul Nagpal, Anasua Bhowmik* ............................................. 31

Design and Implementation of Semantic Caching Coherency Control Scheme Toward Distributed Environment

*Hai Wan, Lei Li* ................................................................. 41

Energy Efficient United L2 Cache Design with Instruction/Data Filter Scheme

*Zhiqiang Ma, Zhenzhou Ji, Mingzeng Hu, Yi Ji* ........................... 52

Improving Latency Tolerance of Network Processors Through Simultaneous Multithreading

*Bo Liang, Hong An, Fang Lu, Rui Guo* ...................................... 61
RIMP: Runtime Implicit Predication
YuXing Tang, Kun Deng, XiaoDong Wang, Yong Dou,
XingMing Zhou ................................................  71

Static Partitioning vs Dynamic Sharing of Resources in Simultaneous MultiThreading Microarchitectures
Chen Liu, Jean-Luc Gaudiot .............................. 81

Algorithm and Theory

Autonomous-Centered Problem Allocation Oriented to Cooperation
Xiping Liu, Wanchun Dou, Guihai Chen, Shijie Cai,
Jiashan Tang .................................................. 91

Contention-Free Communication Scheduling for Irregular Data Redistribution in Parallelizing Compilers
Kun-Ming Yu, Chi-Hsiu Chen, Ching-Hsien Hsu, Chang Wu Yu,
Chiu Kuo Liang ............................................... 101

Experiments on Asynchronous Partial Gauss-Seidel Method
Hiroshi Nishida, Hairong Kuang ......................... 111

Improved Program Dependence Graph and Algorithm for Static Slicing Concurrent Programs
Jianyu Xiao, Deyun Zhang, Haiquan Chen, Hao Dong ............ 121

Parallelisation of Sequential Programs by Invasive Composition and Aspect Weaving
Mikhail Chalabine, Christoph Kessler .................. 131

Revisiting the Election Problem in Asynchronous Distributed Systems
SungUoon Bauk .............................................. 141

Scheduling Scheme with Fairness and Adaptation in the Joint Allocation of Heterogeneous Resources
Yu Hua, Chanle Wu, Mengxiao Wu ......................... 151

Solving the Symmetric Tridiagonal Eigenproblem Using MPI/OpenMP Hybrid Parallelization
Yonghua Zhao, Jiang Chen, Xuebin Chi .................... 164

Trust Management with Safe Privilege Propagation
Gang Yin, Huai-min Wang, Tao Liu, Ming-feng Chen,
Dian-xi Shi .................................................. 174
Vector Space Based on Hierarchical Weighting: A Component Ranking Approach to Component Retrieval
   Gui Gui, Paul D. Scott ........................................ 184

System and Software

A High Availability Mechanism for Parallel File System
   Hu Zhang, Weiguo Wu, Xiaoshe Dong, Depei Qian .............. 194

A User-Guided Semi-automatic Parallelization Method and Its Implementation
   Chuliang Weng, Zhongguo Chen, Xinda Lu, Minglu Li, Yong Yin .... 204

CAPU: Enhancing P2P File Sharing System with Capacity Aware Topology
   Hongliang Yu, Weimin Zheng, Dongsheng Wang, Haitao Dong, Lu Li ......................................................... 214

Implementing Component Persistence in CCM Based on StarPSS
   Jingbin An, Yan Jia, Zhiying Wang .................................. 226

Load Balancing Design Issues on Prefetch-Based DSM Systems
   Hsiao-Hsi Wang, Kuan-Ching Li, Kuo-Jen Wang, Ssu-Hsuan Lu, Chun-Chieh Yang .................................................. 234

Task Assignment for Network Processor Pipelines Using GA
   Shoumeng Yan, Xingshe Zhou, Lingmin Wang, Fan Zhang, Haipeng Wang ............................................................. 244

Test-Suite Reduction Using Genetic Algorithm
   Xue-ying Ma, Bin-kui Sheng, Cheng-qing Ye ........................ 253

Grid Computing

A Constellation Model for Grid Resource Management
   Yinfeng Wang, Xiaoshe Dong, Xiuqiang He, Hua Guo, Fang Zheng, Zhongsheng Qin .............................................. 263

An Effective Information Service Architecture in Grid Environment
   Huashan Yu, Yin Luo, Xingguo Zhu, Xiaoming Li .................. 273
