Foreword

This book contains most of the papers presented at the 4th International Conference on Extreme Programming and Agile Processes in Software Engineering (XP 2003), held in Genoa, Italy, May 2003.

The XP 200n series of conferences were started in 2000 to promote the exchange of new ideas, research and applications in the emerging field of agile methodologies for software development. Over the years, the conference has become the main world forum for all major advances in this important field.

Also this year the contributions to Agile Methodologies and Extreme Programming were substantial. They demonstrate that the topic is continuing to gain more and more momentum. In spite of some criticism of agile methodologies, everyone agrees that they address some unresolved needs of software practitioners. People still do not know how to develop software on time, with the desired features, and within the given budget!

This volume is divided into several thematic sections, easing reader’s navigation through the content. Full papers are presented first, followed by research reports, papers from the Educational Symposium, and papers from the Ph.D. Symposium. The presentations given during three panel sessions held at the conference conclude the book.

The section on Managing Agile Processes includes contributions highlighting the sometimes difficult relationship between agile methodologies and management, and includes approaches and suggestions that should facilitate the acceptance of agile methodologies at the different levels of management.

The section on Methodology Issues presents papers on general-interest methodological issues, covering topics such as design in agile methodologies, RUP and XP, and dynamic models of the agile software development process.

The section on Extending Agile Methodologies and XP deals with applying XP to real-time and embedded systems, and, at a more abstract level, with extending XP toward important software engineering topics such as the CMM and formal methods.

The section on Methods and Tools includes papers on agile development and naked objects, and on continuous integration, refactoring, and process support tools.

The section on Teaching and Introducing Agile Methodologies reports experiences, studies and guidelines that will be surely useful to those practitioners wishing to adopt agile methodologies.

Three sections on more specific XP and agile development practices follow: Testing, Pair Programming, and Other XP Practices. These papers discuss the state-of-the-art of agile design, programming, and project management techniques. We are confident that they will be of utmost interest to researchers and practitioners.
The section on *Experience Reports* completes the first part of the book, presenting successful experiences on the introduction of agile methodologies in industry.

The next two sections present short papers discussing trials, novel and hot ideas, and research plans. They are divided into *Methods and Tools* and *Experience Reports*. We believe that these short, sharp, easy-to-read papers give a taste of what is really going on in the field of agile methodologies.

The section on the *Extreme Educational Symposium* includes papers and short communications on teaching and learning agile methods presented at this symposium held at XP 2003.

The section on the *Ph.D. Symposium* includes short communications presented by Ph.D. students at this symposium held at XP 2003. They document the work done now by the people who will become the leaders of the discipline in the near future.

The last section documents the three panels that were presented at XP 2003, on the hottest topics related to agile methodologies. It includes position papers by some of the most prominent leaders in the field.

We are grateful to all contributors for their excellent papers and to those members of the Program Committee who participated in the review process.

We thank Jutta Eckstein for organizing the Educational Symposium and reviewing the related papers, Paul Grünbacher for organizing the Ph.D. Symposium, and Steven Fraser for setting up the panels.

We also thank Marco Melis and Katiuscia Mannaro for their contribution to the preparation of these proceedings.

We express our appreciation to the Free University of Bolzano-Bozen, the University of Cagliari, and the University of Genoa. They made the XP 2003 conference possible!

We thank Microsoft (10,000 Euro), ThoughtWorks (5000 Euro), the Agile Alliance (1000 Euro) and eXoftware (1000 Euro) for sponsoring XP 2003.

Special thanks also go to the members of the Organizing Committee, Alberto Sillitti (Chair), Matteo Canessa, Paolo Vernazza, Marco Scotto and Sara Picardi for their essential contributions to the XP 2003 Website management and local organization.

March 2003

Michele Marchesi

Giancarlo Succi
Organization

Center for Applied Software Engineering, Faculty of Computer Science, Free University of Bolzano-Bozen

Dept. of Electrical and Electronic Engineering, University of Cagliari

LIPS, Dept. of Communication, Computer and System Sciences (DIST), University of Genoa

Executive and Program Committee

General Chair: Jim Highsmith (Cutter Consortium, USA)
Program Chair: Giancarlo Succi (University of Bolzano-Bozen, Italy)
Tutorial Chair: Michele Marchesi, Italy
Organizing Chair: Alberto Sillitti, Italy
Workshop Chair: Jose Canós Cerda, Spain
Ph.D. Symposium Chair: Paul Grünbacher, Austria
Activity Session Chair: Leon Moonen, The Netherlands
Panel Chair: Steven Fraser, USA
Educational Symposium Chair: Jutta Eckstein, Germany
Publicity Committee Chair: Erik Lundh, Sweden
Co-chair (Northern Europe): Mike Holcombe, UK
Co-chair (Southern Europe): Ernesto Damiani, Italy
Co-chair (Australia): Steve Hayes, Australia
Co-chair (New Zealand): Robert Biddle, New Zealand
Co-chair (Asia): Yoshihide Nagase, Japan
Co-chair (US and Mexico): Laurie Williams, USA
Co-chair (Canada): Luigi Benedicenti, Canada
Co-chair (Central and South America): Moacir Pedroso, Brazil

Scientific Committee

Scott W. Ambler (USA) Luigi Benedicenti (Canada)
Ann Anderson (USA) Robert Biddle (New Zealand)
Dave Astels (Canada) Jose H. Canós Cerda (Spain)
H. Glenn Ballard (USA) Jens Coldewey (Germany)
Kent Beck (USA) Ernesto Damiani (Italy)
VIII Organization

Jutta Eckstein (Germany)  Moacir Pedroso (Brazil)
Khaled El-Emam (Canada)  Witold Pedrycz (Canada)
John Favaro (Italy)  Joseph Pelrine (Switzerland)
Steven Fraser (USA)  Mary Poppendieck (USA)
Steve Freeman (UK)  David Putnam (UK)
Gerhard Friedrich (Austria)  Václav Rajlich (USA)
Arrigo Frisiani (Italy)  Rachel Reinitz (USA)
Andrew Fuqua (USA)  Linda Rising (USA)
Paul Grünbacher (Austria)  Bernhard Rumpe (Germany)
Jim Highsmith (USA)  Barbara Russo (Italy)
Andrea Janes (Italy)  Ken Schwaber (USA)
Ron Jeffries (USA)  Alberto Sillitti (Italy)
Martin Lippert (Germany)  Arie van Deursen (The Netherlands)
Eric Lundh (Sweden)  Christian Wege (Germany)
Tim Mackinnon (UK)  Don Wells (USA)
Leon Moonen (The Netherlands)  Frank Westphal (Germany)
Yoshihide Nagase (Japan)  Laurie Williams (USA)
Jim Newkirk (USA)

# Table of Contents

## Managing Agile Processes

XP after Enron – Can It Survive? .......................................................... 1  
*Mike Holcombe*

Trailing-Edge Management ............................................................... 9  
*David Putman*

Value Based Management and Agile Methods .................................... 16  
*John Favaro*

Lean Management – A Metaphor for Extreme Programming? ............... 26  
*Micthea Dall’Agnol, Andrea Janes, Giancarlo Succi,  
and Enrico Zaninotto*

## Methodology Issues

Metaphor Design Spaces ................................................................. 33  
*Martin Lippert, Axel Schmolitzky, and Heinz Züllighoven*

An Experiment Working with RUP and XP .......................................... 41  
*Patricio Letelier, José H. Canós, and Emilio A. Sánchez*

Bridging Cognitive and Social Chasms in Software Development Using Extreme Programming ................................................................. 47  
*Orit Hazzan and Yael Dubinsky*

A System Dynamics Simulation Model to Find the Effects of XP on Cost of Change Curve ................................................................. 54  
*S. Kuppuswami, K. Vivekanandan, and Paul Rodrigues*

## Extending Agile Methodologies and XP

Real-Time Extreme Programming ..................................................... 63  
*Craig Gelowitz, Ian Sloman, Luigi Benedicenti, and Raman Paranjape*

Software Development under Stringent Hardware Constraints:  
Do Agile Methods Have a Chance? .................................................... 73  
*Jussi Ronkainen and Pekka Abrahamsson*

Maturing XP through the CMM ......................................................... 80  
*Jonas Martinsson*

Formal Extreme (and Extremely Formal) Programming ....................... 88  
*Ángel Herranz and Juan José Moreno-Navarro*
Methods and Tools

Agile Development Using Naked Objects ................................. 97
Richard Pawson and Vincent Wade

XPSwiki: An Agile Tool Supporting the Planning Game ................. 104
Sandro Pinna, Simone Mauri, Paolo Lorrai, Michele Marchesi,
and Nicola Serra

CruiseControl.NET: Continuous Integration for .NET ............... 114
R. Owen Rogers

Tool Support for Complex Refactoring to Design Patterns .......... 123
Carmen Zannier and Frank Maurer

Teaching and Introducing Agile Methodologies

Experiences in Learning XP Practices: A Qualitative Study .......... 131
Bjørnar Tessem

Swimming around the Waterfall:
Introducing and Using Agile Development
in a Data Centric, Traditional Software Engineering Company .... 138
Donald Howard

Cross-Continent Development Using Scrum and XP .................. 146
Bent Jensen and Alex Zilmer

Coaching Coaches .................................................................. 154
Görel Hedin, Lars Bendix, and Boris Magnusson

Testing

Where Do Unit Tests Come from? ...................................... 161
Jing Yuan, Mike Holcombe, and Marian Gheorghe

Three Patterns in Java Unit Testing ................................. 170
Eric Nickell and Ian Smith

XP with Acceptance-Test Driven Development:
A Rewrite Project for a Resource Optimization System .......... 180
Johan Andersson, Geoff Bache, and Peter Sutton

A Customer Test Generator for Web-Based Systems ............... 189
Rick Mugridge, Bruce MacDonald, and Partha Roop

A Framework for Testing at the Edge – An Experience Report .... 198
Alwin Ibb and Carsten Ohlemeyer
# Pair Programming

An Empirical Analysis on the Discontinuous Use of Pair Programming . . . . 205  
*Andrea Janes, Barbara Russo, Paolo Zuliani, and Giancarlo Succi*

Pair-Programming Effect on Developers Productivity .......................... 215  
*Sven Heiberg, Uuno Puus, Priit Salumaa, and Asko Seeba*

When Does a Pair Outperform Two Individuals? ............................. 225  
*Kim Man Lui and Keith C.C. Chan*

# Other XP Practices

Being Jane Malkovich: A Look Into the World of an XP Customer .......... 234  
*Angela Martin, James Noble, and Robert Biddle*

Using Actual Time: Learning How to Estimate .................................. 244  
*Piergiuliano Bossi*

Coaching a Customer Team ......................................................... 254  
*David Hussman*

Extreme Design by Contract ....................................................... 261  
*Yishai A. Feldman*

Inline Method Considered Helpful: An Approach to Interface Evolution .. 271  
*Tammo Freese*

# Experience Reports

Practical Experiences of Agility in the Telecom Industry ...................... 279  
*Jari Vanhanen, Jouni Jartti, and Tuomo Kähkönen*

XP – Call in the Social Workers .................................................... 288  
*Tim Mackinnon*

Embracing Change: An XP Experience Report .................................... 298  
*Andrew M. Fuqua and John M. Hammer*

Extreme Makeover: Bending the Rules to Reduce Risk  
Rewriting Complex Systems ..................................................... 307  
*Sharon Johnson, Jia Mao, Eric Nickell, and Ian Smith*

# Research Reports: Methods and Tools

Component-Oriented Agile Software Development ............................. 315  
*Zoran Stojanovic, Ajantha Dahanayake, and Henk Sol*

Unit Testing beyond a Bar in Green and Red ................................... 319  
*Rudolf Ramler, Gerald Czech, and Dietmar Schlosser*
Developing Testable Web-Applications with Bugkilla ................................. 322
   Christian Dedek, Dirk M. Sohn, Matthias Niete, Sabine Winkler,
   and Andreas Spall

Extreme Programming: A More Musical Approach
   to Software Development? ......................................................... 325
   Andrew Johnston and Chris S. Johnson

Automated Extract Component Refactoring .......................... 328
   Hironori Washizaki and Yoshiaki Fukazawa

Successful Automation of GUI Driven Acceptance Testing .... 331
   Charles Lowell and Jeremy Stell-Smith

Extreme Terseness: Some Languages Are More Agile than Others .... 334
   Stephen Taylor

EnterpriseXP: Can the Combination of XP and DSDM Improve the Appeal
   of XP to the Business Community? .................................... 337
   Mark Simmonds and Barry Fazackerley

Using Function Points in XP – Considerations .................. 340
   Andrew M. Fuqua

Refactoring with Aspects .......................................................... 343
   Granville Miller

Research Reports: Experience Reports

Extreme Programming at Work .................................................. 347
   Walter Ambu and Fabrizio Gianneschi

Combining Agile Practices with UML and EJB:
  A Case Study in Agile Development .......................... 351
   Richard Paige, Priyanka Agarwal, and Phillip Brooke

Practice Makes Perfect .......................................................... 354
   Sharifah Syed-Abdullah, Mike Holcombe, and Marian Gheorghe

A Designing Practice and Two Coding Practices
   for Extreme Programming (XP) .................................. 357
   Mustafa Yildiz and Selahattin Kuru

Practical Aspects of XP Practices ........................................... 360
   Teodora Bozheva

Scaling Extreme Programming
   in a Market Driven Development Context ........................... 363
   Daniel Karlström and Per Runeson
Building Standard ERP Software Packages Using Self-developed Agile Methodologies ............................ 366  
   Andrea Rinaldi and Luigi Benedicenti

Convincing the Inconvincable ........................................ 369  
   Geoff Oliphant

Comparing Extreme Programming to Traditional Development for Student Projects: A Case Study .................................. 372  
   John Noll and Darren C. Atkinson

XP: Good for Anything Other than Software Development? ................. 375  
   Hans Dermot Doran

**Extreme Educational Symposium**

Using Instructor Written Acceptance Tests Using the Fit Framework ..... 378  
   Daniel H. Steinberg

Teaching Team Work: An Extreme Week for First-Year Programmers ..... 386  
   Petra Becker-Pechau, Holger Breitling, Martin Lippert,  
   and Axel Schmolitzky

Design-led & Design-less: One Experiment and Two Approaches .......... 394  
   Francisco Macias, Mike Holcombe, and Marian Gheorghe

Agile Teaching of an Agile Software Process ............................. 402  
   Vieri Del Bianco and Giordano Sassaroli

Five Challenges in Teaching XP ........................................ 406  
   Rick Mugridge, Bruce MacDonald, Partha Roop, and Ewan Tempero

Challenges in Teaching Test Driven Development ........................ 410  
   Rick Mugridge

Filleting XP for Educational Purposes .................................. 414  
   Friedrich Steimann, Jens Gößner, and Thomas Mück

Using XP with Children for Learning Mathematics ........................ 418  
   Maria A. Droujkova and Dmitri A. Droujkov

Using Metaphors in eXtreme Programming Projects ........................ 420  
   Yael Dubinsky and Orit Hazzan

**Ph.D. Symposium**

Doctoral Symposium at XP 2003 ....................................... 422  
   Paul Grünbacher
Collaboration on Software Tasks .................................................. 423
  *Hans Gallis*

Unit Testing Using Design by Contract and Equivalence Partitions ........ 425
  *Per Madsen*

Exploring the XP Customer Role ................................................. 427
  *Angela Martin*

Extending Testability for Automated Refactoring ............................. 429
  *Bartosz Walter*

Software Configuration Management for Test-Driven Development .......... 431
  *Tammo Freese*

A Study on Introducing XP to a Software Development Company .......... 433
  *Harald Svensson*

Teaching eXtreme Programming in a Project-Based Capstone Course ...... 435
  *Yael Dubinsky*

Mitigating Risks in Mobile System Development ................................ 437
  *Norbert Seyff*

Extreme Advertised Bidding .......................................................... 439
  *Peter Regner and Thomas Wiesinger*

Software Effort Estimation: Planning XP Guidelines Compared to Research on Traditional Software Development ......................... 441
  *Kjetil Moløkken*

Collecting Data in Web Service Development ................................... 443
  *Alberto Sillitti*

Measuring the Effectiveness of Agile Methodologies Using Data Mining, Knowledge Discovery and Information Visualization ..................... 445
  *Andrea Janes*

Evaluation of New Software Engineering Methodologies ..................... 447
  *Marco Scotto*

Evaluation of Product Metrics Applied to Agile Methodologies .......... 449
  *Matteo Canessa*

Panels

Coaching for Agile and Xtreme Practices – *A Fishbowl with Piranhas* ...... 451
  *Steven Fraser, Rachel Reinitz, Jutta Eckstein, Joshua Kerievsky, Erik Lundh, Rob Mee, and Mary Poppendieck*
XP Practices versus Values? ........................................ 455
