Preface

Welcome to IWQoS 2001 in Karlsruhe!

Quality of Service is a very active research field, especially in the networking community. Research in this area has been going on for some time, with results getting into development and finally reaching the stage of products. Trends in research as well as a reality check will be the purpose of this Ninth International Workshop on Quality of Service.

IWQoS is a very successful series of workshops and has established itself as one of the premier forums for the presentation and discussion of new research and ideas on QoS. The importance of this workshop series is also reflected in the large number of excellent submissions. Nearly 150 papers from all continents were submitted to the workshop, about a fifth of these being short papers. The program committee were very pleased with the quality of the submissions and had the difficult task of selecting the relatively small number of papers which could be accepted for IWQoS 2001. Due to the tough competition, many very good papers had to be rejected.

The accepted papers included in these proceedings can be neatly structured into sessions and we have a very interesting workshop program which covers the following areas: Provisioning and Pricing; Systems QoS; Routing; TCP Related; Aggregation and Active Networks Based QoS; Wireless and Mobile; Scheduling and Dropping; and Scheduling and Admission Control. Finally, we have a session in which the accepted short papers will be presented. The contributed workshop program is complemented by a strong invited program with presentations on "Quality of Service – 20 years old and ready to get a job?" and "Automated, dynamic traffic engineering in multi-service IP networks", and by a panel discussion on "How will media distribution work in the Internet?".

While IWQoS is now a very well established event, we nevertheless want it to be a lively workshop with lots of interesting discussions. Thus, we would like to encourage all participants to take an active part during the discussions of the presented work as well as during the breaks and social events.

Here we would also like to thank our sponsors and patrons, namely SAP AG / CEC Karlsruhe – Corporate Research, Enterasys Networks, Ericsson Éurolab, Siemens, IBM, NENTEC, and Gunther-Schroff-Stiftung, who helped to make the workshop possible. Moreover, IWQoS 2001 is supported by technical co-sponsorship in-cooperation with the IEEE Communications Society, ACM SIGCOMM, and IFIP WG 6.1.

We heartily thank the program committee, and also all the expert reviewers, for their efforts and hard work especially in the reviewing and selection process – a large number of reviews had to be prepared in a very short time!

Finally, many thanks to the local organizers, especially Klaus Wehrle and Marc Bechler, but also all the other people helping with the workshop organization.

June 2001

**Table of Contents**

**Invited Program**

Keynote: Quality of Service – 20 Years Old and Ready to Get a Job?  
*Henning Schulzrinne (Columbia University)*

Panel Discussion: How Will Media Distribution Work in the Internet?  
*Andrew Campbell (Columbia University), Carsten Griwodz (University of Oslo, Chair), Jörg Liebeherr (University of Virginia), Dwight Makaroff (University of Ottawa), Andreas Mauthe (tecmath AG), Giorgio Ventre (University of Napoli), Michael Zink (Darmstadt University of Technology)*

Invited Talk: Automated, Dynamic Traffic Engineering in Multi-service IP Networks  
*Joseph Sventek (Agilent Laboratories Scotland)*

---

**Provisioning and Pricing**

Dynamic Core Provisioning for Quantitative Differentiated Service  
*Raymond R.-F. Liao, Andrew T. Campbell (Columbia University)*

Towards Provisioning Diffserv Intra-Nets  
*Ulrich Fiedler, Polly Huang, Bernhard Plattner (Swiss Federal Institute of Technology)*

Analysis of Paris Metro Pricing Strategy for QoS with a Single Service Provider  
*Ravi Jain, Tracy Mullen, Robert Hausman (Telcordia Technologies)*

Why Value Is Everything: A User-Centered Approach to Internet Quality of Service and Pricing  
*Anna Bouch, M. Angela Sasse (University College London)*

---

**Systems QoS**

Traveling to Rome: QoS Specifications for Automated Storage System Management  
*John Wilkes (HP Laboratories)*

## Wireless and Mobile

**GAME Based QoS Provisioning in Multimedia Wideband CDMA Networks** .................................................. 235  
*Mohamed Moustafa, Ibrahim Habib (City University of New York), Mahmoud Naghshineh (IBM Watson Research Center)*

**QoS-Aware Adaptive Services in Mobile Ad-Hoc Networks** ............... 251  
*Baochun Li (University of Toronto)*

## Short Paper Session

**Experimental Extensions to RSVP – Remote Client and One-Pass Signalling** .................................................. 269  
*Martin Karsten (Darmstadt University of Technology)*

**Extended Quality-of-Service for Mobile Networks** ....................... 275  
*Jukka Manner, Kimmo Raatikainen (University of Helsinki)*

**Quality of Service Schemes for IEEE 802.11: A Simulation Study** ........ 281  
*Anders Lindgren, Andreas Almquist, Olov Schelén (Luleå University of Technology)*

**Differentiated Services over Shared Media** ............................ 288  
*Pascal Anelli, Gwendal Le Grand (Laboratoire d’Informatique de Paris 6)*

**End-to-Edge QoS System Integration: Integrated Resource Reservation Framework for Mobile Internet** ................. 294  
*Yasunori Yasuda (NTT Information Sharing Platform Labs), Nobuhiko Nishio, Hideyuki Tokuda (Keio University)*

**Problems of Elastic Traffic Admission Control in an HTTP Scenario** ...... 300  
*Joachim Charzinski (Siemens)*

## Aggregation and Active Networks Based QoS

**Aggregation and Scalable QoS: A Performance Study** .................. 307  
*Huirong Fu, Edward W. Knightly (Rice University)*

**Customizable Cooperative Metering for Multi-ingress Service Level Agreements in Differentiated Network Services** ............... 325  
*Syed Umair Ahmed Shah, Peter Steenkiste (CMU)*
Segmented Adaptation of Traffic Aggregates......................... 342  
Hermann de Meer, Piers O’Hanlon (University College London)

Scheduling and Dropping

Differentiated Services with Lottery Queueing ..................... 357  
Joseph Eggleston, Sugih Jamin (University of Michigan)

On Creating Proportional Loss-Rate Differentiation: Predictability and Performance...................................................... 372  
Ulf Bodin, Andreas Jonsson, Olov Schelén  
(Luleå University of Technology)

Scheduling and Admission Control

A Novel Scheduler for a Low Delay Service within Best-Effort ........ 389  
Paul Hurley, Jean-Yves Le Boudec (EPFL),  
Mourad Kara (University of Leeds), Patrick Thiran (Sprint ATL)

JoBS: Joint Buffer Management and Scheduling for Differentiated Services 404  
Jörg Liebeherr, Nicolas Christin (University of Virginia)

Optimal Call Admission Control under Generalized Processor Sharing Scheduling .......................................................... 419  
Antonis Panagakis, Ioannis Stavrakakis (University of Athens)

Author Index ............................................................... 435
