Preface

The Pacific Rim International Conferences on Artificial Intelligence (PRICAI) are biennial international events. The PRICAI series aims at stimulating research by promoting exchange and cross-fertilization of ideas among different branches of Artificial Intelligence. It also provides a common forum for researchers and practitioners in various fields of AI to exchange new ideas and share their experience.

This volume contains the proceedings of the 7th Pacific Rim International Conference on Artificial Intelligence (PRICAI 2002) held in Tokyo, Japan. PRICAI 2002 received 161 submissions from 25 countries. From these, 57 papers (35%) were accepted for presentation and are included in this volume. Over 30 papers were accepted for poster presentations, and a 1-page abstract for each poster is included in this volume. All submitted papers were refereed by two or more reviewers selected by the Program Committee members. The reviewers’ comments were carefully examined and discussed by the members of the Program Committee to ensure fairness and consistency in the selection process.

The technical program comprised two days of workshops and tutorials, followed by paper sessions, invited talks, and special sessions. The invited speakers, Prof. Norman Foo (Univ. New South Wales), Prof. Eduard Hovy (USC/ISI), Prof. Micheal Pazzani (UC Irvine/Adaptiveinfo), Dr. Thomas Rist (DFKI), and Prof. Ryohei Nakatsu (ATR/Kwansei-Gakuin Univ.), are internationally distinguished researchers. We thank them for also preparing papers on their talks. These papers are included in these proceedings.

The success of a conference depends on support and cooperation from many individuals and organizations; PRICAI 2002 was no exception. The PRICAI 2002 conference was sponsored by the Japanese Society for Artificial Intelligence (JSAI), in cooperation with 12 other academic institutes. Support from the National Institute of Informatics (NII), Japan, is also gratefully acknowledged.

We would like to take this opportunity to thank the authors, Program Committee members, reviewers and fellow members of the Conference Committee for their time and effort spent on making PRICAI 2002 a successful and enjoyable conference. Thanks also go to Maurice Pagnucco for coordinating workshops and organizing a special session on workshop summaries, and to Koichi Hori for coordinating tutorials. We also thank the PRICAI steering committee for giving us an opportunity to organize the program of PRICAI 2002.
Finally, we thank Springer-Verlag and its Computer Science Editor, Alfred Hofmann, Erika Siebert-Cole, and Anna Kramer, for efficient assistance in publishing these proceedings of PRICAI 2002 as a volume in its Lecture Notes in Artificial Intelligence series. Also, Junichiro Mori of the University of Tokyo helped us in preparing the files for this volume.

August 2002

Mitsuru Ishizuka
Abdul Sattar
Organization

PRICAI 2002 was organized by the Japanese Society for Artificial Intelligence (JSAI), and held at the National Center of Science in Tokyo, Japan, August 18–22, 2002. Six workshops also took place jointly with the main PRICAI conference.

Conference Committee

General Chair: Hozumi Tanaka
(Tokyo Inst. of Tech, Japan)
Organizing Chair: Takao Terano
(Tsukuba Univ., Japan)
Program Co-chairs: Mitsuru Ishizuka
(Univ. of Tokyo, Japan)
Abdul Sattar
(Griffith Univ., Australia)
Workshop Chair: Maurice Pagnucco
(Univ. of New South Wales, Australia)
Tutorial Chair: Koichi Hori
(Univ. of Tokyo, Japan)
Finance Co-Chairs: Masaaki Okochi
(IBM Japan)
Fumihiro Maruyama
(Fujitsu Laboratories, Japan)
Publicity Co-chairs: Hideki Asoh
(AIST, Japan)
Hideaki Takeda
(National Institute of Informatics, Japan)
Local Arrangement Co-chairs: Katsumi Nitta
(Tokyo Inst. of Tech., Japan)
Hideaki Takeda
(National Institute of Informatics, Japan)
Secretariat: Procom International, Japan

The Operations Research Society of Japan (ORSJ)
The Virtual Reality Society of Japan (VRSJ)
Japan Society for Software Science and Technology (JSSST)
The Robotics Society of Japan (RSJ)

Supporting Institute

National Institute of Informatics (NII)
Table of Contents

Invited Talks

Commercial Applications of Machine Learning for Personalized Wireless Portals ................................................................. 1  
  Michael J. Pazzani

Learning, Collecting, and Using Ontological Knowledge for NLP .......... 6  
  Eduard Hovy

Hidden Variables in Knowledge Representation ............................ 7  
  Norman Y. Foo

Intellimedia Systems: Research and Applications at the Intersection of Multimedia and Artificial Intelligence ....................... 9  
  Thomas Rist

Integration of Multimedia and Art for New Human-Computer Communications .......................................................... 19  
  Ryohei Nakatsu

Logic and AI Foundation

R-UNSEARCHMO: A Refinement on UNSEARCHMO .......................... 29  
  Yuyan Chao, Norimitsu Kawana, Lifeng He, Tsuyoshi Nakamura, Hidenori Itoh

Deontic Relevant Logic: A Strong Relevant Logic Approach to Removing Paradoxes from Deontic Logic ........................... 39  
  Takahiro Tagawa, Jingde Cheng

Solving the Ramification Problem: Causal Propagation in an Argumentation-Theoretic Approach ........................................... 49  
  Quoc Bao Vo, Norman Y. Foo

Representation and Reasoning of Actions

Representing Actions over Dynamic Domains ................................. 60  
  Yan Zhang, Norman Y. Foo

Consistency of Action Descriptions ............................................. 70  
  Dongmo Zhang, Samir Chopra, Norman Y. Foo
Solving Factored MDPs with Large Action Space Using Algebraic Decision Diagrams ................................................................. 80
   Kee-Eung Kim, Thomas Dean

Dynamic Fuzziness ............................................................. 90
   Andrzej Buller

Constraint Satisfaction

Distributed Reinforcement of Arc-Consistency .......................... 97
   Ahlem Ben Hassine, Khaled Ghédira

Parallel Execution of Stochastic Search Procedures on Reduced SAT Instances ................................................................. 108
   Wenhui Zhang, Zhuo Huang, Jian Zhang

Two Transformations of Clauses into Constraints and Their Properties for Cost-Based Hypothetical Reasoning ................. 118
   Yutaka Matsuo, Mitsuru Ishizuka

Foundations for Agents

Hidden Markov Modeling for Multi-agent Systems .................... 128
   Noda Itsuki

Modelling PRS-Like Agents’ Mental States ............................ 138
   Wayne Wobcke

Genetic Algorithm and Social Simulation .............................. 148
   Pinata Winoto

Foundations for Learning

Adaptive Directed Acyclic Graphs for Multiclass Classification ........ 158
   Boonserm Kijsirikul, Nitiwut Ussivakul, Surapant Meknavin

Network Optimization through Learning and Pruning in Neuromanifold . 169
   Hyunjin Lee, Hyeyoung Park, Yillbyung Lee

DIC: A Novel Discrete Incremental Clustering Technique for the Derivation of Fuzzy Membership Functions ................................. 178
   W.L. Tung, C. Quek

Reinforcement Learning

Application of Episodic Q-Learning to a Multi-agent Cooperative Task . 188
   Akira Ito
