Sustainable Internet

Third Asian Internet Engineering Conference, AINTEC 2007
Phuket, Thailand, November 27-29, 2007
Proceedings

Springer
Preface

The 3rd Asian Internet Engineering Conference (AINTEC) followed the first two successful editions held in Bangkok, Thailand, and focused on developing synergies between researchers in Asia and worldwide, but was also a unique chance for young, talented regional scientists to meet and interact. AINTEC 2007 was therefore a major opportunity for presentations and discussions around these objectives. In particular, it aimed at addressing issues pertinent to the Asian region with vast diversities of socio-economic and networking conditions while inviting high-quality and recent research results from the global international research community to be presented. The conference is single-track to favor discussions among a diverse set of participants.

We want to thank the authors of the 66 papers submitted for considering AINTEC as the right target for their paper. The submissions came from 18 countries with, as expected, a majority from Asia. The program was composed of 14 accepted papers organized in 6 technical sessions including 7 invited talks by leading experts on innovative topics, presentations of papers, demos, posters and a pre-conference 18th Asian School on Computer Science (November, 25–26 2007).

You might think that AINTEC is yet another conference but it has different objectives and spirit, it offers a great opportunity to discuss future challenges for a sustainable Internet, and to get to know the local and regional researchers and enjoy the great hospitality of Thailand.

This edition was made possible thanks to many individuals. We want to warmly thank the Program Committee members for accepting to spend time in supporting the conference and carefully reviewing the submissions. We are very pleased with the support from Springer as a publisher for the proceedings and would like to thank them for their trust. Finally, our strong recognition goes to Apinun Tunpan, who took care of all the logistics in managing the review process and Kanchana Kancharanasut for perfectly orchestrating the event. We, personally, enjoyed being involved in this edition of AINTEC.

November 2007

# Table of Contents

## Invited Talk 1

Packet Forwarding in Pocket Switched Networks – An Empirical Characterization of Human Mobility

*Christophe Diot*

### Session 1: Wireless Networks

Mobility Versus Density Metric for OLSR Enhancement

*Cholatip Yawut, Beatrice Paillassa, and Riadh Dhaou*

DAD-MPR Flooding Protocol, Convergence Evaluation Through Simulation

*Saadi Boudjit, Cédric Adjih, and Paul Muhlethaler*

A Prototyping Environment for Wireless Multihop Networks

*Fehmi Ben Abdesslem, Luigi Iannone, Marcelo Dias de Amorim, Katia Obraczka, Ignacio Solis, and Serge Fdida*

Efficient Selection of Multipoint Relays in Wireless Ad Hoc Networks with Realistic Physical Layer

*Dhavy Gantsou and Patrick Sondi*

## Invited Talk 2

Mobile Hotspots

*Aruna Seneviratne, Eranga Perera, and Henrik Petander*

## Session 2: Mobility Management

Extending Home Agent Migration to Mobile IPv6 Based Protocols

*Guillaume Valadon and Ryuji Wakikawa*

Experimental Evaluation of EAP Performance in Roaming Scenarios

*Saber Zrelli and Yoichi Shinoda*

## Session 3: Packet Transmission

Unidirectional Lightweight Encapsulation with Header Compression for IP Based Satellite Communication over DVB-S

*Chee-Hong Teh, Tat-Chee Wan, Rahmat Budiarto, and Way-Chuang Ang*
Analysis of FEC Function for Real-Time DV Streaming ............... 114
Kazuhisa Matsuzono, Hitoshi Asaeda, Kazunori Sugiura,
Osamu Nakamura, and Jun Murai

Invited Talk 3
Ubiquitous Devices, Mobility and Context Awareness ............... 123
Jean-Marie Hullot

Session 4: Applications and Services
Improving the Load Balancing Performance of Reliable Server Pooling
in Heterogeneous Capacity Environments ........................... 125
Xing Zhou, Thomas Dreibholz, and Erwin P. Rathgeb

WOD – Proxy-Based Web Object Delivery Service ............... 141
Kai-Hsiang Yang and Jan-Ming Ho

Invited Talk 4
Implementation Issues of Early Application Identification ............. 156
Laurent Bernaille and Renata Teixeira

Invited Talk 5
Securing Internet Coordinate Systems ............................... 167
Dali Kaafar, Laurent Mathy, Kavé Salamatian, Chadi Barakat,
Thierry Turletti, and Walid Dabbous

Session 5: Network Monitoring
A Real-Time Performance-Monitoring Tool for Emergency Networks . 169
Shuprabha Shakya, Mohamad Abdul Awal, Dwijendra K. Das,
Yasuo Tsuchimoto, and Kanchana Kanchanasut

A Role-Based Peer-to-Peer Approach to Application-Oriented
Measurement Platforms ............................................... 184
Kenji Masui and Youki Kadobayashi

Invited Talk 6
Gap Analysis in IP Multicast Dissemination ............... 199
Hitoshi Asaeda and Bill Manning
# Session 5: Routing

Can Forwarding Loops Appear When Activating iBGP Multipath Load Sharing?

*Simon Balon and Guy Leduc*

Quality-of-Service Multicast Overlay Spanning Tree Algorithms for Wireless Ad Hoc Networks

*Georgios Rodolakis, Cédric Adjih, Anis Laouiti, and Saadi Boudjit*

# Invited Talk 7

Architecture of Satellite Internet for Asia-Wide Digital Communications

*Kotaro Kataoka, Achmad Husni Thamrin, Kenjiro Cho, Jun Takei, and Jun Murai*

# Author Index
