Preface

This volume of the Lecture Notes in Computer Science series contains the papers accepted for presentation at the Third International Conference on Autonomous Infrastructure, Management and Security (AIMS 2009). The conference took place in Enschede, The Netherlands, hosted by the University of Twente. AIMS 2009 was organized and supported by the EC IST-EMANICS Network of Excellence (#26854) and co-sponsored by IFIP WG 6.6 and the Strategic Research Orientation of the University of Twente on Dependable Systems and Networks (DSN).

AIMS 2009 constituted the Third edition of a single-track and standalone conference on management and security aspects of distributed and autonomous systems, which took place initially in Oslo, Norway in June 2007, followed by AIMS 2008 in Bremen, Germany.

The theme of the AIMS 2009 conference was “Scalability of Networks and Services,” focusing on how scalable networked systems can be monitored, managed, and protected in an efficient and autonomous way. The research papers that have been selected for publication in the present proceedings have approached this theme from different perspectives, covering topics such as network resource management, overlays and peer-to-peer networks, network configuration and optimization, and monitoring and visualization.

This diversity has helped AIMS 2009 once again to reach its main objective: to be a cross-disciplinary conference where researchers can exchange their results with sufficient time for discussion of novel ideas. For the main conference program, we received a total number of 28 paper submissions. The submissions came, according to the affiliation of the first author, from 14 different countries. Seven papers came from non-European countries, the same number were submitted from non-academic organizations.

The second objective of the AIMS conference series is to provide a venue for doctoral students to present and discuss their research ideas in a wider audience. In this way, students obtain feedback about their results achieved so far, as well as about their future research plans. This idea has been implemented in the form of a PhD workshop. In total, the workshop received 15 PhD paper submissions in which PhD students gave a description of their research problem and the chosen approach, and outlined the results achieved. In addition to the main conference program and the PhD workshop, AIMS 2009 also included a tutorial program (not part of the proceedings).

All submitted conference and PhD workshop papers were reviewed by three members of the Technical Program Committee (TPC) (and additional reviewers) and the PhD Workshop Committee, respectively. Based on the reviews, and discussions with the TPC members if needed, the Program Chairs identified 12 conference papers for publication and presentation at the AIMS conference. In addition, three short papers were selected for presentation. For the PhD workshop, the Workshop Chairs selected eight papers to be included in the proceedings and to be presented at the conference.
We would like to thank the many people who helped make AIMS 2009 such a high-quality and successful event. Our thanks first go to the PhD Workshop Chairs David Hausheer and George Pavlou and to the Tutorial and Keynote Chairs Emil Lupu and Iris Hochstatter for all their efforts in constructing the technical program. In addition, we like to acknowledge the great review work performed by the members of the committees and the additional reviewers. Another special thanks goes to all authors who submitted their contributions to AIMS 2009. Finally, we would like to thank Springer, namely Alfred Hofmann and Anna Kramer, for the smooth cooperation in finalizing these proceedings. Last but not least, special thanks go to Tiago Fioreze, Silvia Meijran, Giovane Moura, and Anna Sperotto for the local organization and to the University of Twente for hosting the AIMS 2009 conference.

April 2009

Aiko Pras
Organization

AIMS 2009 was organized by the EC IST-EMANICS Network of Excellence (#26854) and co-sponsored by IFIP WG 6.6 and the Strategic Research Orientation of the University of Twente on Dependable Systems and Networks (DSN).

General Chair
Aiko Pras  
University of Twente, The Netherlands

Program Chairs
Ramin Sadre  
University of Twente, The Netherlands
Aiko Pras  
University of Twente, The Netherlands

PhD Workshop Chairs
David Hausheer  
University of Zurich, Switzerland
George Pavlou  
University College London, UK

Tutorial/Keynote Chairs
Emil Lupu  
Imperial College London, UK
Iris Hochstatter  
Universität der Bundeswehr München, Germany

Steering Committee
Arosha Bandara  
The Open University, UK
Mark Burgess  
Oslo University College, Norway
Olivier Festor  
INRIA Nancy - Grand Est, France
David Hausheer  
University of Zurich, Switzerland
Aiko Pras  
University of Twente, The Netherlands
Jürgen Schönwälder  
Jacobs University Bremen, Germany
Rolf Stadler  
KTH Royal Institute of Technology, Sweden

Technical Program Committee
Arosha Bandara  
The Open University, UK
Marcus Brunner  
NEC Europe Ltd., Germany
Isabelle Chrisment  
ESIAL, Nancy University, France
Alva Couch  
Tufts University, USA
Gabi Dreo Rodosek  
Universität der Bundeswehr München, Germany
Olivier Festor  
INRIA Nancy - Grand Est, France
Alberto Gonzalez  
KTH Royal Institute of Technology, Sweden

David Hausheer  
University of Zurich, Switzerland

Heinz-Gerd Hegering  
Leibniz Supercomputing Center, Germany

Georgios Karagiannis  
University of Twente, The Netherlands

Alexander Keller  
IBM Global Technology Services, USA

Antonio Liotta  
Eindhoven University of Technology, The Netherlands

Jorge Lobo  
IBM T. J. Watson Research Center, USA

Emil Lupu  
Imperial College, UK

Hanan Lutfiyya  
University of Western Ontario, Canada

Jean-Philippe Martin-Flatin  
NetExpert, Switzerland

Hermann De Meer  
University of Passau, Germany

Jiri Novotny  
Masaryk University, Czech Republic

Bruno Quoitin  
Université catholique de Louvain, Belgium

Danny Raz  
Technion, Israel

Helmut Reiser  
Leibniz Supercomputing Center, Germany

Jürgen Schönwälder  
Jacobs University Bremen, Germany

Joan Serrat  
Universitat Politècnica de Catalunya, Spain

Maarten van Steen  
Vrije Universiteit Amsterdam, The Netherlands

Radu State  
University of Luxembourg, Luxembourg

Burkhard Stiller  
University of Zurich, Switzerland

Robert Szabo  
Budapest University of Technology and Economics, Hungary

Filip De Turck  
Ghent University, Belgium

Kurt Tutschku  
University of Vienna, Austria

Marcel Waldvogel  
University of Konstanz, Germany

Lisandro Zambenedetti  
Universidade Federal do Rio Grande do Sul, Brazil

Granville  

Tanja Zseby  
Fraunhofer FOKUS, Germany

PhD Workshop Committee

Gabi Dreo Rodosek  
Universität der Bundeswehr München, Germany

Olivier Festor  
INRIA Nancy - Grand Est, France

Emil Lupu  
Imperial College London, UK

Hanan Lutfiyya  
University of Western Ontario, Canada

Joan Serrat

# Table of Contents

## Network Resource Management

Secure User-Controlled Lightpath Provisioning with User-Controlled Identity Management ............................................ 1  
*Bob Hulsebosch, Robert de Groote, and Martin Snijders*

A Statistical Analysis of Network Parameters for the Self-management of Lambda-Connections ................................. 15  
*Tiago Fioreze, Lisandro Granville, Ramin Sadre, and Aiko Pras*

Dynamics of Resource Closure Operators ................................................. 28  
*Alva L. Couch and Marc Chiarini*

## Overlays and P2P Networks

Churn Tolerance Improvement Techniques in an Algorithm-Neutral DHT ................................................................. 42  
*Kazuyuki Shudo*

PeerVote: A Decentralized Voting Mechanism for P2P Collaboration Systems ............................................................. 56  
*Thomas Bocek, Dalibor Peric, Fabio Hecht, David Hausheer, and Burkhard Stiller*

Evaluation of Sybil Attacks Protection Schemes in KAD ................. 70  
*Thibault Cholez, Isabelle Chrisment, and Olivier Festor*

## Network Configuration and Optimization

NETCONF Interoperability Testing ......................................................... 83  
*Ha Manh Tran, Iyad Tumar, and Jürgen Schönwälder*

Knowledge Management and Promises ................................................. 95  
*Mark Burgess*

A Policy-Driven Network Management System for the Dynamic Configuration of Military Networks ......................... 108  
*Wei Koong Chai, Kin-Hon Ho, Marinos Charalambides, and George Pavlou*
A Strategy for Multi-Agent Based Wireless Sensor Network Optimization .................................................... 122
Ahmad Sardouk, Rana Rahim-Amoud, Leïla Merghem-Boulahia, and Dominique Gaiotti

Monitoring and Visualization

Flow Monitoring in Wireless MESH Networks ....................... 134
Cristian Popi and Olivier Festor

Visualization of Node Interaction Dynamics in Network Traces ....... 147
Petar Dobrev, Sorin Stancu-Mara, and Jürgen Schönwälder

Short Papers

Towards Energy Efficient Change Management in a Cloud Computing Environment .............................................................. 161
Hady AbdelSalam, Kurt Maly, Ravi Mukkamala, Mohammad Zubair, and David Kaminsky

A Market-Based Pricing Scheme for Grid Networks ...................... 167
Peng Gao, Xingyao Wu, Tao Liu, and David Hausheer

Consistency of Network Traffic Repositories: An Overview .......... 173
Elmer Lastdrager and Aiko Pras

PhD Workshop

A P2P-Based Approach to Cross-Domain Network and Service Management .............................................................. 179
Adriano Fiorese, Paulo Simões, and Fernando Boavida

PeerCollaboration ...................................................... 183
Thomas Bocek and Burkhard Stiller

Fast Learning Neural Network Intrusion Detection System .......... 187
Robert Koch and Gabi Dreo

Design of an Autonomous Framework for Efficient Large Scale Management of Next Generation Web Service Mashups .......... 191
Anna Hristoskova and Filip De Turck

Scalable Detection and Isolation of Phishing ........................... 195
Giovane C.M. Moura and Aiko Pras

Multi-agent Reinforcement Learning in Network Management .......... 199
Ricardo Bagnasco and Joan Serrat
