Communications
in Computer and Information Science 57
As future generation information technology (FGIT) becomes specialized and fragmented, it is easy to lose sight that many topics in FGIT have common threads and, because of this, advances in one discipline may be transmitted to others. Presentation of recent results obtained in different disciplines encourages this interchange for the advancement of FGIT as a whole. Of particular interest are hybrid solutions that combine ideas taken from multiple disciplines in order to achieve something more significant than the sum of the individual parts. Through such hybrid philosophy, a new principle can be discovered, which has the propensity to propagate throughout multifaceted disciplines.

FGIT 2009 was the first mega-conference that attempted to follow the above idea of hybridization in FGIT in a form of multiple events related to particular disciplines of IT, conducted by separate scientific committees, but coordinated in order to expose the most important contributions. It included the following international conferences: Advanced Software Engineering and Its Applications (ASEA), Bio-Science and Bio-Technology (BSBT), Control and Automation (CA), Database Theory and Application (DTA), Disaster Recovery and Business Continuity (DRBC; published independently), Future Generation Communication and Networking (FGCN) that was combined with Advanced Communication and Networking (ACN), Grid and Distributed Computing (GDC), Multimedia, Computer Graphics and Broadcasting (MulGraB), Security Technology (SecTech), Signal Processing, Image Processing and Pattern Recognition (SIP), and u-and e-Service, Science and Technology (UNESST).

We acknowledge the great effort of all the Chairs and the members of advisory boards and Program Committees of the above-listed events, who selected 28% of over 1,050 submissions, following a rigorous peer-review process. Special thanks go to the following organizations supporting FGIT 2009: ECSIS, Korean Institute of Information Technology, Australian Computer Society, SERSC, Springer LNCS/CCIS, COEIA, ICC Jeju, ISEP/IPP, GECAD, PoDIT, Business Community Partnership, Brno University of Technology, KISA, K-NBTC and National Taipei University of Education.

We are very grateful to the following speakers who accepted our invitation and helped to meet the objectives of FGIT 2009: Ruay-Shiung Chang (National Dong Hwa University, Taiwan), Jack Dongarra (University of Tennessee, USA), Xiaohua (Tony) Hu (Drexel University, USA), Irwin King (Chinese University of Hong Kong, Hong Kong), Carlos Ramos (Polytechnic of Porto, Portugal), Timothy K. Shih (Asia University, Taiwan), Peter M.A. Sloot (University of Amsterdam, The Netherlands), Kyu-Young Whang (KAIST, South Korea), and Stephen S. Yau (Arizona State University, USA).
We would also like to thank Rosslin John Robles, Maricel O. Balitanas, Farkhod Alisherov Alisherovich, and Feruza Sattarova Yusfoyna – graduate students of Hannam University who helped in editing the FGIT 2009 material with a great passion.

Preface

We would like to welcome to the proceedings of the 2009 International Conference on Bio-Science and Bio-Technology (BSBT 2009), organized as part of the 2009 International Mega-Conference on Future Generation Information Technology (FGIT 2009), held during December 10–12, 2009, at the International Convention Center Jeju, Jeju Island, South Korea.

BSBT 2009 focused on various aspects of advances in bio-science and biotechnology with computational sciences, mathematics and information technology. It provided a chance for academic and industry professionals to discuss recent progress in the related areas. We expect that the conference and its publications will be a trigger for further related research and technology improvements in this important subject.

We would like to acknowledge the great effort of all the Chairs and members of the Program Committee. Out of around 70 submissions to BSBT 2009, we accepted 22 papers to be included in the proceedings and presented during the conference. This gives roughly a 30% acceptance ratio. Two of the papers accepted for BSBT 2009 were published in the special FGIT 2009 volume, LNCS 5899, by Springer. The remaining 20 accepted papers can be found in this CCIS volume.

We would like to express our gratitude to all of the authors of submitted papers and to all of the attendees, for their contributions and participation. We believe in the need for continuing this undertaking in the future.

We would also like to acknowledge KuoYuan Hwa (National Taipei University of Technology, Taiwan) and Chien-Yeh Hsu (Taipei Medical University, Taiwan) for organizing the special session on Advanced Information and Computational Technology for Biomedical Research.

Once more, we thank all the organizations and individuals who supported FGIT 2009 as a whole and, in particular, helped in the success of BSBT 2009.

Organization

Organizing Committee

General Chairs
- Tughrul Arslan (Edinburgh University, UK)
- Wai-chi Fang (National Chiao Tung University, Taiwan)

Advisory Board
- Saman Halgamuge (University of Melbourne, Australia)
- Joseph Kolibal (University of Southern Mississippi, USA)
- Philip Maini (University of Oxford, UK)
- Byoung-Tak Zhang (Seoul National University, Korea)

Program Chairs
- Xiaofeng Song (NUAA, Nanjing, China)
- Tai-hoon Kim (Hannam University, Korea)

Program Committee

Asai Asaithambi, Javier Ortega-Garcia, R. Ponalagusamy
A.Q.K. Rajpoot, Jim Torrensen, Rattikorn Hewett
Adrian Stoica, Jongwook Woo, Saman Halgamuge
Ajay Kumar, J.A. Ferreira Costa, Stan Z. Li
Arun Ross, José Manuel Molina, Stephen Cameron
Bob McKay, Juan Manuel Corchado, Suash Deb
Carlos Juiz, Kayvan Najarian, Tatsuya Akutsu
Cesare Alippi, Kenji Mizuguchi, Tommaso Mazza
Dana Lodrova, Kevin Daimi, Waleed Abdullah
Davide Anguita, Li Xiaoli, Wei Zhong
Dong-Yup Lee, Liangjiang Wang, Witold Pedrycz
Emilio Corchado, Lusheng Wang, Xiaohua (Tony) Hu
Farzin Deravi, Martin Drahansky, Yaoqi Zhou
Francisco Herrera, Matthias Dehmer, Yong Shi
George A. Gravanis, Meena K. Sakharkar, Yu Zheng
Hujun Yin, Michael E. Schuckers, Zhenan Sun
Janusz Kacprzyk, Pong C. Yuen, Zizhong Chen
Jason T.L. Wang, QingZhong Liu
Table of Contents

The Weighting Analysis of Influence Factor in Clinical Skin Physiology Assessment via Rough Set Method ................................. 1  
Hui-Yi Liang, Ya-Ting Lee, Mei-Li You, and Kun-Li Wen

Identifying Candidate Disease Gene GAD2 for Obesity by Computational Gene Prioritization Tool ENDEAVOUR ................. 9  
Huanping Zhang, Xiaofeng Song, and Huinan Wang

A Novel Suppression Operator Used in optaiNet ..................... 17  
Jungan Chen, Feng Liang, and Wenxin Chen

Principal Subspace Analysis Based BCG Artifact Removal in Single Channel EEG Signal Measured Inside MRI Scanner .............. 24  
Tahir Rasheed, Young-Koo Lee, and Sungyoung Lee

Genetical Analysis of Ascochyta Blight Resistance in Chickpea .... 31  
Alireza Taleei, Homayoun Kanouni, and Michael Baum

A PMMA Micro-suction Tool for Capsular Endoscope Using a Solid Chemical Propellant .................................................. 38  
Ho-soo Park, Kyo-in Koo, Sang-min Lee, Jae-won Ban, Hyo-young Jeong, and Dong-il Cho

Statistical Analysis of Hippocampus Shape Using a Modified Mann-Whitney-Wilcoxon Test ............................................. 45  
Nikhil Ram Mohan, Carey Priebe, Youngser Park, and Majnu John

QTL Mapping for Forage Quality-Related Traits in Barley .......... 53  
Alireza Taleei, Barat Ali Siahsar, and Seyed Ali Peighambari

Fluorimetric Determination of L-3-Hydroxybutyrate Concentrations in the Serum of Normal and Aristolochic Acid-Treated Mice ........ 63  
Chien-Ming Chen, Yih-Huei Uen, Chen-Yi Kuo, Tzu-Chuan Huang, and Jen-Ai Lee

Designing a Column-Switching High-Performance Liquid Chromatograph System for Enantiomeric Separation of Mouse Urinary D,L-Lactate ...................................................... 69  
Chien-Ming Chen and Chi-Fu Yen

A New Approach for Veins Detection ................................. 76  
Dana Lodrová, Radim Dvořák, Martin Drahanský, and Filip Orság
