Preface

Computational Collective Intelligence –
Technologies and Applications
Third International Conference ICCCI 2011
September 21–23, 2011, Gdynia, Poland

This volume contains the proceedings (Part I) of the Third International Conference on Computational Collective Intelligence (ICCCI 2011) held at Gdynia Maritime University in Poland during September 21–23, 2011. The conference was organized by Gdynia Maritime University in cooperation with Wroclaw University of Technology in Poland. The conference was run under the scientific patronage of the Committee of Informatics, Polish Academy of Sciences and the Polish Artificial Intelligence Society.

Following the successes of the First International Conference on Computational Collective Intelligence: Semantic Web, Social Networks and Multiagent Systems (ICCCI 2009) held in Wroclaw, Poland, and the Second International Conference on Computational Collective Intelligence (ICCCI 2010) held in Kaohsiung, Taiwan, ICCCI 2011 continued to provide an internationally respected forum for scientific research in the computer-based methods of collective intelligence and their applications.

Computational collective intelligence (CCI) is most often understood as a sub-field of artificial intelligence (AI) dealing with soft computing methods that enable group decisions to be made or knowledge to be processed among autonomous units acting in distributed environments. Methodological, theoretical and practical aspects of CCI are considered as the form of intelligence that emerges from the collaboration and competition of many individuals (artificial and/or natural). The application of multiple computational intelligence technologies such as fuzzy systems, evolutionary computation, neural systems, consensus theory, etc., can support human and other collective intelligence, and create new forms of CCI in natural and/or artificial systems. Three subfields of application of computational intelligence technologies to support various forms of collective intelligence are of special attention but are not exclusive: Semantic Web (as an advanced tool increasing collective intelligence), social network analysis (as the field targeted to the emergence of new forms of CCI), and multiagent systems (as a computational and modeling paradigm especially tailored to capture the nature of CCI emergence in populations of autonomous individuals).

The ICCCI 2011 conference featured a number of keynote talks, oral presentations and invited sessions, closely aligned to the theme of the conference. The conference attracted a substantial number of researchers and practitioners from
all over the world, who submitted their papers for the main track subdivided into ten thematic streams and seven special sessions.

The main track streams, covering the methodology and applications of CCI, include: Machine Learning and Applications, Collective Computations and Optimization, Web Services and Semantic Web, Social Networks, Complex Systems and Intelligent Applications, Ontology Management, Knowledge Management, Agents and Multiagent Systems, Mobile Agents and Robotics, Modeling, Simulation and Decision Making, Applications of Computational Collective Intelligence in Shipping. The special sessions, covering some specific topics of particular interest, include: Computational Collective Intelligence in Bioinformatics, Computational Collective Intelligence-Based Optimization Models, Autonomous and Collective Decision-Making, Collective Intelligence in Web Systems, Web Systems Analysis, Computational Swarm Intelligence and Applications, Computational Swarm Intelligence, Discovering Relationships in Data, and finally, Computational Collective Intelligence in Economy.

We received almost 300 submissions from over 25 countries. Each paper was reviewed by two to four members of the International Program Committee and International Reviewer Board. Only 109 best papers were selected for oral presentation and publication in the two volumes of the ICCCI 2011 proceedings.

We would like to express our sincere thanks to the Honorary Patrons: the Mayor of Gdynia, Wojciech Szczurek, the Rector of Gdynia Maritime University, Romuald Cwilewicz, and the Rector of Wrocław University of Technology, Tadeusz Więckowski. Our special gratitude goes to the Honorary Chairs, Pierre Lévy from the University of Ottawa, Canada, and Roman Slowiński from Poznań University of Technology, Poland, for their support.

We would also like to express our thanks to the Keynote Speakers: Jeng-Shyang Pan, Leszek Rutkowski, Edward Szczesbicki and Jan Treur, for their interesting and informative talks of world-class standard. We also thank our partners, University of Information Technology (Vietnam), National Taichung University of Education (Taiwan), and Academic Computer Centre in Gdańsk (Poland), for their kind support.

Special thanks go to the Organizing Chairs (Radosław Katarzyniak and Dariusz Barbucha) for their efforts in the organizational work. Thanks are due to the Program Co-chairs, Program Committee and the Board of Reviewers, essential for reviewing the submissions to ensure the high quality of accepted papers. We also thank the members of the Local Organizing Committee, Publicity Chairs and Special Sessions Chairs.

Finally, we cordially thank all the authors, presenters and delegates for their valuable contribution to this successful event. The conference would not have been possible without their support.
It is our pleasure to announce that the ICCCI conference series is closely cooperating with the Springer journal *Transactions on Computational Collective Intelligence* and the IEEE SMC Technical Committee on *Transactions on Computational Collective Intelligence*.

We hope that ICCCI 2011 significantly contributed to the fulfillment of the academic excellence, leading to even more successful of ICCCI events in the future.

September, 2011

Piotr Jędrzejowicz
Ngoc Thanh Nguyen
Kiem Hoang
Organization

Honorary Patrons

Wojciech Szczurek  Mayor of Gdynia, Poland
Romuald Cwilewicz  Rector of Gdynia Maritime University
Tadeusz Więckowski  Rector of Wroclaw University of Technology

Honorary Chairs

Pierre Lévy  University of Ottawa, Canada
Roman Słowiński  Poznan University of Technology, Poland

General Chairs

Piotr Jędrzejowicz  Gdynia Maritime University, Poland
Ngoc Thanh Nguyen  Wroclaw University of Technology, Poland

ICCCI Steering Committee

Ngoc Thanh Nguyen  Wroclaw University of Technology, Poland – Chair
Piotr Jędrzejowicz  Gdynia Maritime University, Poland – Co-chair
Ryszard Kowalczyk  Swinburne University of Technology, Australia – Co-chair
Shyi-Ming Chen  National Taiwan University of Science and Technology, Taiwan
Adam Grzech  Wroclaw University of Technology, Poland
Lakhmi C. Jain  University of South Australia, Australia
Geun-Sik Jo  Inha University, Korea
Janusz Kacprzyk  Polish Academy of Sciences, Poland
Ryszard Tadeusiewicz  AGH University of Science and Technology, Poland
Toyoaki Nishida  Kyoto University, Japan

Program Chairs

Ireneusz Czarnowski  Gdynia Maritime University, Poland
Jason J. Jung  Yeungnam University, Korea
Ryszard Kowalczyk  Swinburne University of Technology, Australia
Kazumi Nakamatsu  University of Hyogo, Japan
X Organization

Organizing Chairs
Dariusz Barbucha  Gdynia Maritime University, Poland
Radoslaw Katarzyniak  Wroclaw University of Technology, Poland

Special Session Chairs
Amine Chohra  Paris-East University, France
Tokuro Matsuo  Yamagata University, Japan
Ewa Ratajczak-Ropel  Gdynia Maritime University, Poland

Publicity Chair
Izabela Wierzbowska  Gdynia Maritime University, Poland

Doctoral Track Chair
Bogdan Trawinski  Wroclaw University of Technology, Poland

Keynote Speakers
Jeng-Shyang Pan  National Kaohsiung University of Applied Sciences, Taiwan
*Overview of Algorithms for Swarm Intelligence*

Leszek Rutkowski  Technical University of Czestochowa, Poland
*Rough-Neuro-Fuzzy-Genetic Hybrid Intelligent Systems*

Edward Szczerbicki  The University of Newcastle, Australia
*Experiential Decisional DNA*

Jan Treur  VU University Amsterdam, The Netherlands
*From Mirroring to the Emergence of Shared Understanding and Collective Power*
Special Sessions

1. *Computational Collective Intelligence in Bioinformatics (CCIB 2011)*
   
   Stanisław Kozielski  
   Silesian University of Technology, Poland
   
   Bożena Małysiak-Mrozek  
   Silesian University of Technology, Poland
   
   Dariusz Mrozek  
   Silesian University of Technology, Poland

2. *CCI-Based Optimization Models (CCIBOM 2011)*
   
   Piotr Jędrzejowicz  
   Gdynia Maritime University, Poland
   
   Dariusz Barbucha  
   Gdynia Maritime University, Poland

   
   Amine Chohra  
   Paris-East University, France

   
   Kazimierz Choroś  
   Wrocław University of Technology, Poland
   
   Mohamed Hassoun  
   ENSSIB, Villeurbanne, France

5. *Computational Collective Intelligence in Economy (CCIE 2011)*
   
   Tadeusz Szuba  
   AGH University of Science and Technology, Poland
   
   Stanisław Szydło  
   AGH University of Science and Technology, Poland
   
   Paweł Skrzyński  
   AGH University of Science and Technology, Poland

6. *Swarm Intelligence and Applications (SIA 2011)*
   
   Mong-Fong Horng  
   National Kaohsiung University of Applied Sciences, Taiwan
   
   Jeng-Shyang Pan  
   National Kaohsiung University of Applied Sciences, Taiwan

7. *Computational Swarm Intelligence—Discovering Relationships in Data (CSI 2011)*
   
   Urszula Boryczka  
   University of Silesia, Poland
   
   Mariusz Boryczka  
   University of Silesia, Poland

## Table of Contents – Part II

### Applications of Computational Collective Intelligence in Shipping

Evolutionary Sets of Safe Ship Trajectories: Problem-Dedicated Operators ................................................................. 221  
*Rafał Szłapczyński and Joanna Szłapczyńska*

Evolutionary Sets of Safe Ship Trajectories: Improving the Method by Adjusting Evolutionary Techniques and Parameters 231  
*Rafał Szłapczyński*

Comparison of Selection Schemes in Evolutionary Method of Path Planning ................................................................. 241  
*Piotr Kolendo, Bartosz Jaworski, and Roman Śmierzchalski*

Evidence Representation and Reasoning in Selected Applications .......... 251  
*Władzimierz Filipowicz*

Application of Artificial Intelligence Methods for the Diagnosis of Marine Diesel Engines ........................................... 261  
*Adam Charchalis and Rafał Pawletko*

### Computational Collective Intelligence in Bioinformatics

Scalable System for Protein Structure Similarity Searching ............. 271  
*Bożena Małysiak-Mrozek, Alina Momot, Dariusz Mrozek, Lukasz Hera, Stanisław Koziełski, and Michał Momot*

Efficient Algorithm for Microarray Probes Re-annotation .......... 281  
*Paweł Foszner, Aleksandra Gruca, Andrzej Polański, Michał Marczyk, Roman Jaksik, and Joanna Polańska*

### CCI-Based Optimization Models

Learning Method for Co-operation .................................................. 290  
*Ewa Dudek-Dyduch and Edyta Kucharska*

Experimental Evaluation of the Agent-Based Population Learning Algorithm for the Cluster-Based Instance Selection 301  
*Ireneusz Czarnowski and Piotr Jędrzejowicz*

Double-Action Agents Solving the MRCPSP/Max Problem ............. 311  
*Piotr Jędrzejowicz and Ewa Ratajczak-Ropel*

Parallel Cooperating A-Teams .................................................. 322  
*Dariusz Barbucha, Ireneusz Czarnowski, Piotr Jędrzejowicz, Ewa Ratajczak-Ropel, and Izabela Wierzbowska*
Solving the Capacitated Vehicle Routing Problem by a Team of Parallel Heterogeneous Cooperating Agents ............................................................ 332
Dariusz Barbucha

Autonomous and Collective Decision-Making

Validated Decision Trees versus Collective Decisions ....................... 342
Krzysztof Grabczewski

Time and Personality Dependent Behaviors for Agent Negotiation with Incomplete Information .......................................................... 352
Amine Chohra, Arash Bahrammirzaee, and Kurosh Madani

Dynamic Selection of Negotiation Protocol in Multi-agent Systems for Disaster Management ............................................................ 363
Amelia Badica, Costin Badica, Sorin Ilie, Alex Muscar, and Mihaia Scafeș

Collective Intelligence in Web Systems - Web Systems Analysis

Guaranteeing Quality of Service in Globally Distributed Web System with Brokers ................................................................. 374
Krzysztof Zatwarnicki

Customized Travel Information Recommendation Framework Using CBR and Collective Intelligence ......................................................... 385
Mye Sohn, Su ho Kang, and Young Min Kwon

Integration of Collective Knowledge in Fuzzy Models Supporting Web Design Process ................................................................. 395
Jaroslaw Jankowski

WordNet Based Word Sense Disambiguation .............................. 405
Andrzej Siemiński

Further Tests with Click, Block, and Heat Maps Applied to Website Evaluations ................................................................. 415
Kazimierz Choros

A Research Study on Business-Oriented Quality-Driven Request Service in a B2C Web Site ................................................................. 425
Grażyna Suchacka and Leszek Borzemski
Computational Collective Intelligence in Economy

Collective Intelligence Approach to Measuring Invisible Hand of the Market .......................................................... 435
  Paweł Skrzyński, Tadeusz Szuba, and Stanisław Szydło

Collective Intelligence of Genetic Programming for Macroeconomic Forecasting ...................................................... 445
  Jerzy Duda and Stanisław Szydło

Computational Swarm Intelligence and Applications

Parallel Appearance-Adaptive Models for Real-Time Object Tracking Using Particle Swarm Optimization 455
  Bogusław Rymut and Bogdan Kwolek

Following the Leader – Particle Dynamics in Constricted PSO .... 465
  Jacek Kabziński

Computational Swarm Intelligence - Discovering Relationships in Data

An Adaptive Discretization in the ACDT Algorithm for Continuous Attributes .......................................................... 475
  Urszula Boryczka and Jan Kozak

Approximate Nash Equilibria in Bimatrix Games ......................... 485
  Urszula Boryczka and Przemysław Juszczuk

Co-operative, Parallel Simulated Annealing for the VRPTW .......... 495
  Rafał Skinderowicz

The Parallel Ant Vehicle Navigation System with CUDA Technology ... 505
  Wojciech Bura and Mariusz Boryczka

Author Index ........................................................................... 515
# Table of Contents – Part I

## Keynote Speeches

- **From Mirroring to the Emergence of Shared Understanding and Collective Power** .................................................. 1  
  *Jan Treur*

- **Experiential Knowledge in the Development of Decisional DNA (DDNA) and Decisional Trust for Global e-Decisional Community** ...... 17  
  *Edward Szczerbicki and Cesar Sanin*

- **Overview of Algorithms for Swarm Intelligence** .................. 28  
  *Shu-Chuan Chu, Hsiang-Cheh Huang, John F. Roddick, and Jeng-Shyang Pan*

## Machine Learning and Applications

- **Neural Network Committees Optimized with Evolutionary Methods for Steel Temperature Control** ................................. 42  
  *Mirosław Kordos, Marcin Blachnik, Tadeusz Wieczorek, and Sławomir Golak*

- **Growing Hierarchical Self-Organizing Map for Images Hierarchical Clustering** ...................................................... 52  
  *Bartłomiej M. Buczek and Paweł B. Myszkowski*

- **AdaBoost Ensemble of DCOG Rough–Neuro–Fuzzy Systems** 62  
  *Marcin Korytkowski, Robert Nowicki, Leszek Rutkowski, and Rafał Scherer*

- **A Two-Armed Bandit Collective for Examplar Based Mining of Frequent Itemsets with Applications to Intrusion Detection** .......... 72  
  *Vegard Haugland, Marius Kjølleberg, Svein-Erik Larsen, and Ole-Christoffer Granmo*

- **Applications of Paraconsistent Artificial Neural Networks in EEG** 82  
  *Jair Minoro Abe, Helder F.S. Lopes, Kazumi Nakamatsu, and Seiki Akama*

- **Features Selection in Character Recognition with Random Forest Classifier** ............................................................. 93  
  *Władysław Homenda and Wojciech Lesiński*
Generating and Postprocessing of Biclusters from Discrete Value Matrices

Marcin Michalak and Magdalena Stawarz

A Validity Criterion for Fuzzy Clustering

Stanisław Brodowski

Estimations of the Error in Bayes Classifier with Fuzzy Observations

Robert Burduk

Building Context-Aware Group Recommendations in E-Learning Systems

Danuta Zakrzewska

Investigation of Random Subspace and Random Forest Methods Applied to Property Valuation Data

Tadeusz Lasota, Tomasz Luczak, and Bogdan Trawiński
