The International Conference on Intelligent Computing (ICIC) was formed to provide an annual forum dedicated to the emerging and challenging topics in artificial intelligence, machine learning, pattern recognition, image processing, bioinformatics, and computational biology. It aims to bring together researchers and practitioners from both academia and industry to share ideas, problems, and solutions related to the multifaceted aspects of intelligent computing.

ICIC 2011, held in Zhengzhou, China, August 11-14, 2011, constituted the 7th International Conference on Intelligent Computing. It built upon the success of ICIC 2010, ICIC 2009, ICIC 2008, ICIC 2007, ICIC 2006, and ICIC 2005 that were held in Changsha, Ulsan/Korea, Shanghai, Qingdao, Kunming, and Hefei, China, respectively.

This year, the conference concentrated mainly on the theories and methodologies as well as the emerging applications of intelligent computing. Its aim was to unify the picture of contemporary intelligent computing techniques as an integral concept that highlights the trends in advanced computational intelligence and bridges theoretical research with applications. Therefore, the theme for this conference was “Advanced Intelligent Computing Technology and Applications”. Papers focusing on this theme were solicited, addressing theories, methodologies, and applications in science and technology.

ICIC 2011 received 832 submissions from 28 countries and regions. All papers went through a rigorous peer-review procedure and each paper received at least three review reports. Based on the review reports, the Program Committee finally selected 281 high-quality papers for presentation at ICIC 2011, which are included in three volumes of proceedings published by Springer: one volume of Lecture Notes in Computer Science (LNCS), one volume of Lecture Notes in Artificial Intelligence (LNAI), and one volume of Lecture Notes in Bioinformatics (LNBI). In addition, among them, the 10 and 44 high-quality papers have also, respectively, been recommended to BMC Bioinformatics and Neurocomputing.

This volume of Lecture Notes in Artificial Intelligence (LNAI) includes 94 papers.

The organizers of ICIC 2011, including Zhengzhou University of Light Industry, Institute of Intelligent Machines of Chinese Academy of Sciences, made an enormous effort to ensure the success of ICIC 2011. We hereby would like to thank the members of the Program Committee and the referees for their collective effort in reviewing and soliciting the papers. We would like to thank Alfred Hofmann, from Springer, for his frank and helpful advice and guidance throughout and for his continuous support in publishing the proceedings.
In particular, we would like to thank all the authors for contributing their papers. Without the high-quality submissions from the authors, the success of the conference would not have been possible. Finally, we are especially grateful to the IEEE Computational Intelligence Society, the International Neural Network Society, and the National Science Foundation of China for their sponsorship.

July 2011

De-Shuang Huang
Yong Gan
Phalguni Gupta

Table of Contents

Intelligent Computing in Scheduling

An Effective Artificial Bee Colony Algorithm for Multi-objective Flexible Job-Shop Scheduling Problem ........................................ 1
   Gang Zhou, Ling Wang, Ye Xu, and Shengyao Wang

An Estimation of Distribution Algorithm for the Flexible Job-Shop Scheduling Problem ......................................................... 9
   Shengyao Wang, Ling Wang, Gang Zhou, and Ye Xu

A Modified Inver-over Operator for the Traveling Salesman Problem... 17
   Yuting Wang, Jian Sun, Junqing Li, and Kaizhou Gao

A Novel Multi-objective Particle Swarm Optimization Algorithm for Flow Shop Scheduling Problems ......................................... 24
   Wanliang Wang, Lili Chen, Jing Jie, Yanwei Zhao, and Jing Zhang

Minimizing the Total Flow Time for Lot Streaming Flow Shop Using an Effective Discrete Harmony Search Algorithm .................... 32
   Hong-Yan Han

Two Techniques to Improve the NEH Algorithm for Flow-Shop Scheduling Problems ................................................................. 41
   Gengcheng Liu, Shiji Song, and Cheng Wu

Flexible Job Shop Scheduling Using a Multiobjective Memetic Algorithm 49
   Tsung-Che Chiang and Hsiao-Jou Lin

A Genetic Algorithm for the Economic Lot Scheduling Problem under Extended Basic Period Approach and Power-of-Two Policy ........ 57
   Onder Bulut, M. Fatih Tasgetiren, and M. Murat Fadiloglu

A Multi-objective Hybrid Discrete Harmony Search Algorithm for Lot-Streaming Flow Shop Scheduling Problem .......................... 66
   Hong-Yan Han

A Dynamic Berth Allocation Problem with Priority Considerations under Stochastic Nature ......................................................... 74
   Evrim Ursavas Guldogan, Onder Bulut, and M. Fatih Tasgetiren

A DE Based Variable Iterated Greedy Algorithm for The No-Idle Permutation Flowshop Scheduling Problem with Total Flowtime Criterion ............................................................................. 83
   M. Fatih Tasgetiren, Quan-Ke Pan, Ling Wang, and Angela H.-L. Chen
Minimizing the Total Flowtime Flowshop with Blocking Using a Discrete Artificial Bee Colony ................................................. 91
   Yu-Yan Han, Jun-Hua Duan, Yu-Jie Yang, Min-Zhang, and Bao-Yun

Local Feature Descriptors for Image Processing and Recognition

Texture Image Classification Using Complex Texton ...................... 98
   Zhenhua Guo, Qin Li, Lin Zhang, Jane You, Wenhuan Liu, and Jinghua Wang

A Perceptually Motivated Morphological Strategy for Shape Retrieval .......................................................... 105
   Rong-Xiang Hu

Theories and Applications of LBP: A Survey .............................. 112
   Yang Zhao

Combinatorial and Numerical Optimization

Vibration Control of a Vehicle Using Hybrid Genetic Algorithm .......... 121
   Syeda Darakhshan Jabeen and Rathindra Nath Mukherjee

Dynamics of a Two Prey One Predator Fishery with Low Predator Density .......................................................... 129
   T. Das, Rathindra Nath Mukherjee, and K.S. Chaudhuri

Natural vs. Unnatural Decomposition in Cooperative Coevolution ...... 138
   Min Shi

A Method to Improve Performance of Heteroassociative Morphological Memories ......................................................... 148
   Naiqin Feng, Yushan Zhang, Lianhui Ao, and Shuangxi Wang

   Bo Wang, Guang-an Zou, and Peng Zhao

Overdetermined Blind Source Separation by Gaussian Mixture Model .......................................................... 162
   Yujia Wang and Yunfeng Xue

New Chosen Ciphertext Secure Public Key Encryption in the Standard Model with Public Verifiability .............................. 170
   Zhiwei Weng, Jian Weng, Kai He, and Yingkai Li
Lazy Learning for Multi-class Classification Using Genetic Programming

Hajira Jabeen and Abdul Rauf Baig

177

Machine Learning Theory and Methods

Actor-Critic Algorithm Based on Incremental Least-Squares Temporal Difference with Eligibility Trace

Yuhu Cheng, Huanting Feng, and Xuesong Wang

183

Active and Passive Nearest Neighbor Algorithm: A Newly-Developed Supervised Classifier

KaiYan Feng, JunHui Gao, KaiRui Feng, Lei Liu, and YiXue Li

189

Support Vector Machines for User-Defined Sheets Recognition in Complex Environment

Wen-sheng Tang, Sheng-chun Wang, and He-long Xiao

197

A New Multi-swarm Multi-objective Particle Swarm Optimization Based on Pareto Front Set

Yanxia Sun, Barend Jacobus van Wyk, and Zenghui Wang

203

Interval Type-2 Fuzzy Markov Chains: Type Reduction

Juan C. Figueroa-García, Dusko Kalenatic, and Cesar Amilcar Lopez

211

A Multi-agent Reinforcement Learning with Weighted Experience Sharing

Lasheng Yu and Issahaku Abdulai

219

Asymmetric Constraint Optimization Based Adaptive Boosting for Cascade Face Detector

Jia-Bao Wen and Yue-Shan Xiong

226

Translation Model of Myanmar Phrases for Statistical Machine Translation

Thet Thet Zin, Khin Mar Soe, and Ni Lar Thein

235

A Multi-objective Genetic Optimization Technique for the Strategic Design of Distribution Networks

Vitoantonio Bevilacqua, Mariagrazia Dotoli, Marco Falagario, Fabio Sciancalepore, Dario D’Ambruoso, Stefano Saladino, and Rocco Scaramuzzi

243

Intelligent Control and Automation

Ordinal Optimization-Based Multi-energy System Scheduling for Building Energy Saving

Zhong-Hua Su, Qing-Shan Jia, and Chen Song

251
Three Levels Intelligent Incident Detection Algorithm of Smart Traffic in the Digital City .................................................. 260
Hongyan Yan, Xiaojuan Zhang, and Hongxia Xu

PID Controller Tuning Using Multi-objective Optimization Based on Fused Genetic-Immune Algorithm and Immune Feedback Mechanism ... 267
Maryam Khoie, Karim Salahshoor, Ehsan Nouri, and Ali Khaki Sedigh
